in recent years the airline industry has experienced severe volatility in earnings with airlines recording periods of substantial profits that are closely followed by periods of financial distress this trend has continued into the new millennium with numerous examples of airlines across the globe entering bankruptcy protection or liquidating the text provides an introduction to both the basics of finance and the particular intricacies of airline finance where there can be significant fluctuations in both revenues and costs this new edition also includes capital budgeting management of current assets financial risk analysis fuel hedging aircraft leasing this textbook contains chapters that cover unique aspects of the aviation financial decision making process these include a rigorous and structured presentation of the buy versus lease decision that is prevalent in the industry a valuation process for aviation assets the recent trend toward privatization and the difficulty inherent in the valuation of a publicly owned or semi publicly owned asset the foundations of airline finance now in its second edition is an introductory text that can be used either as a general financial text or in a specialized class that deals with aviation finance in particular

when starting new airlines in response to government deregulation entrepreneurs in the u s and europe reduced some traditional service qualities to reduce costs concentrated on non stop services between city pairs not already so connected improved on time performance and offered low fares to win leisure travelers from the incumbents and to encourage more travel in recent developments some of the new airlines have

offered optional extras at higher fares to attract business travelers and entered major routes alongside the legacy carriers within both the u s and europe deregulation removed most geographical barriers to expansion by short haul airlines later limited deregulation spread to other world regions where many short haul routes connect city pairs in different countries and where governments have retained traditional two country mechanisms restricting who may fly to gain access to domestic routes in other countries some new airlines are setting up affiliate companies in neighboring countries with each company legally controlled in the country of domicile with air travel growing strongly especially in asia a common result is intense but potentially short lived competition on major routes the recent developments give clear signposts to likely mid term outcomes and make this an opportune time to report on the new airline scene the airline revolution will provide valuable economic analysis of this climate to students airline professionals advancing to senior positions public servants and others who provide advice to governments

in many respects 2014 marked the transition from strong recovery to promising growth for dubai with many exciting projects in the pipeline not least the hosting of expo 2020 the emirate is continuing to build on its reputation as a dynamic and international centre for business already a regional and global centre for business and finance dubai s reputation has been bolstered by the msci s decision to upgrade the uae from frontier to emerging market status in 2014 while the emirate s successful expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors construction is thriving once again driven in large part by strong retail sector growth with various projects including plans for the world s largest mall indicating that the sector will maintain its position as the emirate s biggest gdp contributor moving forward the transport and logistics framework is set for major expansion in the coming years as well furthering cementing the emirate s status as a leading transport and logistics hub not just regionally but globally too the continued development of dubai s retail and hospitality offerings alongside the upgrades to its airports should help to ensure robust growth in visitor numbers from both the region and further afield

melding a pilot s practical view of life in the cockpit with the expertise of an engineering professor to give readers an insider look at plane crashes one of the most amazing feats of modern life is the frequency with which airplanes safely take off and land about 40 000 times a day in the united states alone commercial aviation is by far the safest mode of transportation and is becoming safer all the time but on the exceedingly rare occasion that a plane does crash comprehensive accident analysis thorough investigation and implementation of remedial actions significantly reduces the probability of an already remote event ever recurring plane crash an unprecedented collaboration between mechanical engineering professor george bibel and airline captain robert hedges shares the riveting stories of both high profile and lesser known airplane accidents drawing on accident reports eyewitness accounts and simple diagrams to explain what went wrong in the plane and in the cockpit hedges provides invaluable insight into aviation human factors while bibel analyzes mechanical failures no prior scientific knowledge is needed to understand the principles and procedures this book describes only an interest in the view from what captain hedges describes as the best seat in the house organized around the phases of flight takeoff climb cruise approach and landing this book is a captivating look at some of the most dramatic plane crashes of the modern age including asiana airlines 214 air france 447 and malaysia airlines 370 if you have ever wondered what goes through a pilot s mind as a flight takes a turn for the dangerous what impact turbulence actually has on

flight safety or even just how the wonders of aeronautics work to keep passengers safe day in and out plane crash will both fascinate and educate

the aviation industry presents a unique conundrum with the complex relationship between government oversight and business management while the aviation industry operates in a business oriented manner a considerable number of aviation companies and airports worldwide are still government owned the covid 19 pandemic has accentuated the pivotal role of governments in the industry highlighting the need for a comprehensive understanding of this interaction given the sector s massive economic influence and the extensive investment required the need for an in depth exploration of this liaison has never been more pressing strategic management and policy in the global aviation industry offers an insightful and comprehensive solution to this enigmatic issue this book delves into the dynamics of the aviation sector s reliance on government intervention and support providing invaluable perspectives for academic scholars and industry enthusiasts it explores the critical role governments play in the development and sustainability of aviation companies especially in the wake of the pandemic where governments worldwide stepped in to bolster their national aviation companies additionally the book explores the industry s efforts to align with the united nations sustainability targets and the critical influence of government regulations in achieving these goals it also dissects the digital transformation and the integration of innovative technologies in aviation setting the stage for a more efficient and innovative industry furthermore it unveils the burgeoning role of artificial intelligence in the quest for cost reduction and enhanced operational efficiency in the fiercely competitive aviation market
