this remarkable primate with the curious name is challenging established views on human evolution the bonobo least known of the great apes is a female centered egalitarian species that has been dubbed the make love not war primate by specialists in bonobo society females form alliances to intimidate males sexual behavior in virtually every partner combination replaces aggression and serves many social functions and unrelated groups mingle instead of fighting the species s most striking achievement is not tool use or warfare but sensitivity to others in the first book to combine and compare data from captivity and the field frans de waal a world renowned primatologist and frans lanting an internationally acclaimed wildlife photographer present the most up to date perspective available on the bonobo focusing on social organization de waal compares the bonobo with its better known relative the chimpanzee the bonobo s relatively nonviolent behavior

and the tendency for females to dominate males confront the evolutionary models derived from observing the chimpanzee's male power politics cooperative hunting and intergroup warfare further the bonobo's frequent imaginative sexual contacts along with its low reproduction rate belie any notion that the sole natural purpose of sex is procreation humans share over 98 percent of their genetic material with the bonobo and the chimpanzee is it possible that the peaceable bonobo has retained traits of our common ancestor that we find hard to recognize in ourselves eight superb full color photo essays offer a rare view of the bonobo in its native habitat in the rain forests of zaire as well as in zoos and research facilities additional photographs and highlighted interviews with leading bonobo experts complement the text this book points the way to viable alternatives to male based models of human evolution and will add considerably to debates on the origin of our species anyone interested in primates gender issues evolutionary psychology and exceptional wildlife photography will find a fascinating companion in bonobo the forgotten ape this remarkable primate with the curious name is challenging established views on human evolution the bonobo least known of the great apes is a female centered egalitarian species that has been dubbed the make love not war primate by specialists in

highly descriptive text and stylish photography help explain the life of man's closest cousins with brilliant photography and concise text the authors give us a close up look at our nearest relatives from the grizzled old male gorilla to the playful young orangutans so many of these creatures actions and habits are a reflection of those of human beings this book tells us of the varying lifestyles of gorillas chimpanzees bonobos gibbons and orangutans their social habits their environs and their relationship with humans and the importance of that to their long term survival author following a phd on rehabilitation and reintroduction of orangutans in borneo emmanuelle works as consultant primatologist for various ngos in africa and south america on primate conservation and reintroduction projects a writer and scientific journalist she collaborates with various french magazines including terre sauvage □a m int□resse sciences avenir and geo she has also been a consultant for tv documentaries and has written several books such as □tre singe with the photographer cyril ruoso and ces for□ts qu on assassine an essay on deforestation in the tropics as well as several books for children emmanuelle is president of the jane goodall institut france and of the ngo awely working on human animal conflict resolution throughout the world colour throughout

extrait de la couverture is there something in the basic makeup of human beings that dedicate behavior along gender lines what can we actually know about the gender of the past how has social progress affected gender this book explores perspectives on the nature of sex and gender throughout the world this overview begins with a review of theories regarding the role that gender may have played in past societies the second section focuses on the place of women and men in a wide variety of ways of life from foragers to members of the global community lastly the third section focuses on topics that are most often of interest to students how gender constructs work within families how the gender identities of individuals are created how power affects gender how supernatural beliefs and religious ideologies affect gender and how the realities of globalization and transnationalism influence the lives of men and women

in the human potential for peace an anthropological challenge to assumptions about war and violence renowned anthropologist douglas p fry shows how anthropology with its expansive time frame and comparative orientation can provide unique insights into the nature of war and the potential for peace challenging the traditional view that humans are by nature primarily violent and warlike professor fry argues that along with the capacity for aggression humans also possess a strong ability to prevent limit and resolve conflicts without violence he draws on data from cultural anthropology archaeology and sociology as well as from behavioral ecology and evolutionary biology to construct a biosocial argument that challenges a host of commonly held assumptions

this survey of the moral mind shows how our moral sense engages with different aspects of the human personality with our instincts inherited from our pre human primate ancestors with the way we follow the customs of our community and with our sense of something beyond these instincts and customs the author seeks to show how far evolutionary theory can help us to understand our moral thinking and in the final chapter henry haslam suggests how we may be able to work towards a new consensus on moral issues book jacket

this book reviews the many conflicting theories about human nature those that stress our dark side and those that emphasize our goodness it then explores actual human behavior in societies around the world beginning with earliest and smallest known societies foraging people such as the kung san pygmies then various kinds of farming people and finally city dwellers it also focuses on human behavior during the 20th century providing detailed examples of human kindness and inhumanity it also examines human behavior under the

most terrible kind of stress imaginable deadly prolonged famine how people respond to famine around the world is described with an emphasis on the killer famine that starved much of Ireland from 1845 to 1850 many Irish people died of starvation but unlike other parts of the world where starvation led the strong to kill and eat the weak Irish culture forbade such killing and in reality it did not take place finally the book summarizes the evidence then concludes that even though people have biological urges that lead toward anti social behavior human rule systems can control most of these anti social predispositions

the wondrous remarkable and outlandish activities of animals have long captured our curiosity and no one has better explored or illuminated our fascination than Jeffrey Moussaieff Masson bestselling author of the groundbreaking *Dogs Never Lie About Love* and *When Elephants Weep* Masson's genuine passion for our two and four legged invertebrate flippered and finned friends has turned into his life's calling and earned him a reputation as one of our most provocative authorities on animal behavior now Masson shares his vast knowledge in this comprehensive and charming volume featuring one hundred of his favorite animals drawing upon this affable expert's own experience and extensive research altruistic armadillos zenlike zebras offers fascinating facts colorful anecdotes and surprising tidbits on familiar creatures bottlenose dolphins hummingbirds kangaroos as well as lesser known yet equally entrancing critters bonobos kakapos wombats this guide includes gorgeous photographs and links to educational websites jacket flap

it's the story of the human race and God's unfailing presence this fascinating account of humankind from our beginnings in Africa seven million years ago to the present blends history anthropology and spirituality to demonstrate that God has been and always will be with us from back cover

covers various aspects of zoology in four volumes including the behavior class evolution and physiology of both wild and domestic animals
