this widely popular book is designed to introduce its readers to important concepts in

computer science

papers presented at an all india seminar on advances in product development 17 18 february 2006

the book data intensive computing applications for big data discusses the technical concepts of big data data intensive computing through machine learning soft computing and parallel computing paradigms it brings together researchers to report their latest results or progress in the development of the above mentioned areas since there are few books on this specific subject the editors aim to provide a common platform for researchers working in this area to exhibit their novel findings the book is intended as a reference work for advanced undergraduates and graduate students as well as multidisciplinary interdisciplinary and transdisciplinary research workers and scientists on the subjects of big data and cloud parallel and distributed computing and explains didactically many of the core concepts of these approaches for practical applications it is organized into 24 chapters providing a comprehensive overview of big data analysis using parallel computing and addresses the complete data science workflow in the cloud as well as dealing with privacy issues and the challenges faced in a data intensive cloud computing environment the book explores both fundamental and high level concepts and will serve as a manual for those in the industry while also helping beginners to understand the basic and advanced aspects of big data and cloud computing

the two volume set ccis 775 and 776 constitutes the refereed proceedings of the first international conference on computational intelligence communications and business analytics cicba 2017 held in kolkata india in march 2017 the 90 revised full papers presented in the two volumes were carefully reviewed and selected from 276 submissions the papers are organized in topical sections on data science and advanced data analytics signal processing and communications microelectronics sensors intelligent networks computational forensics privacy and security computational intelligence in bio computing computational intelligence in mobile and quantum computing intelligent data mining and data warehousing computational intelligence

this book presents 53 selected papers focused on deep learning and large language models from the 14th international conference on innovations in bio inspired computing and applications ibica 2023 and 13th world congress on information and communication

technologies wict 2023 which was held in five different cities namely olten switzerland porto portugal kaunas lithuania greater noida india kochi india and in online mode the 23rd international conference on hybrid intelligent systems ibica wict 2023 was focusing on synergistic combinations of multiple approaches to develop the next generation of bio inspired computing and ict systems ibica wict 2023 had contributions by authors from 36 countries this book offers a valuable reference guide for all scientists academicians researchers students and practitioners focused on advanced machine learning including deep learning methods large language models and its real world applications

written in a style that breaks the barriers between the disciplines this monograph enables researchers from life science physics engineering or chemistry to access the most recent results in a common language the resulting review character of this project sets it apart from specialized journals and allows each volume to respond quickly to new developments this third volume contains new topics ranging from chaotic computing via random dice tossing and stochastic limit cycle oscillators to a number theoretic example of self organized criticality wave localization in complex networks and anomalous diffusion a first class board of international scientists advises the editor such that the carefully selected and invited contributions represent the latest and most relevant findings

this book presents soft computing techniques and applications used in healthcare systems along with the latest advancements written as a guide for assessing the roles that these techniques play the book also highlights implementation strategies lists problem solving solutions and paves the way for future research endeavors in smart and next generation healthcare systems this book provides applications of soft computing techniques related to healthcare systems and can be used as a reference guide for assessing the roles that various techniques such as machine learning fuzzy logic and statical mathematics play in the advancements of smart healthcare systems the book presents the basics as well as the advanced concepts to help beginners as well as industry professionals get up to speed on the latest developments in healthcare systems the book examines descriptive predictive and social network techniques and discusses analytical tools and the important role they play in finding solutions to problems in healthcare systems a framework of robust and novel healthcare techniques is highlighted as well as implementation strategies and a setup for future research endeavors healthcare systems using soft computing techniques is a valuable resource for

researchers and postgraduate students in healthcare systems engineering computer science information technology and applied mathematics the book introduces beginners to and at the same time brings industry professionals up to speed with the important role soft computing techniques play in smart healthcare systems

covers the latest methodologies and research on international comparative surveys with contributions from noted experts in the field advances in comparative survey methodology examines the most recent advances in methodology and operations as well as the technical developments in international survey research with contributions from a panel of international experts the text includes information on the use of big data in concert with survey data collecting biomarkers the human subject regulatory environment innovations in data collection methodology and sampling techniques use of paradata across the survey lifecycle metadata standards for dissemination and new analytical techniques this important resource contains contributions from key experts in their respective fields of study from around the globe highlights innovative approaches in resource poor settings and innovative approaches to combining survey and other data includes material that is organized within the total survey error framework presents extensive and up to date references throughout the book written for students and academic survey researchers and market researchers engaged in comparative projects this text represents a unique collaboration that features the latest methodologies and research on global comparative surveys
