### 1 Understanding the Basics Cost

The value of resources used in the production of goods or services Costs can be classified into various categories based on their nature behavior and function

#### Cost Accounting

The process of identifying measuring analyzing interpreting and communicating cost information to aid in decisionmaking

#### Cost Object

Anything for which we want to determine cost This could be a product service department customer or project

#### Cost Allocation

The process of assigning costs to cost objects when a direct relationship is not readily apparent

#### Cost Behavior

How costs change in relation to changes in activity levels Costs can be classified as fixed variable or mixed

### 2 Essential Cost Concepts

#### Direct Costs

Costs directly traceable to a specific cost object Examples include direct materials and direct labor

#### Indirect Costs

Costs that cannot be directly traced to a specific cost object Examples include manufacturing overhead administrative expenses and selling expenses

#### Product Costs

Costs associated with manufacturing a product including direct materials direct labor and manufacturing

overhead Period Costs Costs that are not directly related to the production process and are expensed in the period incurred Examples include selling and administrative expenses

3 Cost Accounting Methods

2 Job Order Costing Used for businesses that produce unique products or services like custom furniture or construction projects Costs are accumulated by job

Process Costing Used for businesses that produce large volumes of identical products like gasoline or chemicals Costs are averaged over the entire production process

ActivityBased Costing ABC A method that assigns costs to products or services based on the activities performed to produce them ABC helps to identify and allocate indirect costs more accurately than traditional methods

4 CostVolumeProfit CVP Analysis BreakEven Point The level of activity at which total revenues equal total costs Contribution Margin The difference between sales revenue and variable costs This represents the amount of money available to cover fixed costs and generate profit Margin of Safety The difference between actual or projected sales and the breakeven point A higher margin of safety indicates a greater cushion against losses Operating Leverage The degree to which a company uses fixed costs in its operations A higher operating leverage means that a small change in sales can lead to a large change in operating income

5 Budgeting and Variance Analysis Budgeting The process of planning and forecasting future costs and revenues Budgets serve as a roadmap for achieving financial goals Variance Analysis The process of comparing actual results to budgeted amounts and identifying the reasons for any discrepancies Favorable Variance When actual costs are less than budgeted costs or actual revenues are greater than budgeted revenues Unfavorable Variance When actual costs are more than budgeted costs or actual revenues are less than budgeted revenues
