This encore edition by Wesley Jacobs is the only comprehensive version ever published for tuba and is carefully engraved to the highest quality standards. The many errors that exist in the old trombone edition are now corrected in this new book. The Bordogni vocalises or melodious *Études* are essential for all tubists. For many years, tubists were required to transpose the Bordogni vocalises melodious *Études* down one octave from the trombone edition. Ideally, and especially when playing the high tuba, the music should be played at pitch as it appears on the page. Many younger tubists did not know how to transpose, and many advanced players did not use the vocalises on instruments in higher keys. Therefore, much of the benefit of Bordogni's works remained untapped.

This book is the first to combine detailed technical, historical, acoustical, and pedagogical information and material in one volume, presenting an accurate and up-to-date overview of the field. The author documents the historical development of major brass instruments in a unique cross-referenced format. The book is organized in two parts. Chapters 1-9 discuss individual brass instruments and their historical development. The remaining five chapters focus on technique, including guidance for teachers of brass instruments as well as a complete method of brass playing. Such topics as embouchure formation, the use of the airstream, common tone production problems, and instrument care are covered in depth and in detail. Individual chapters for each instrument include lists of recommended repertoire for study and importance, reference books, numerous musical examples, and exercises, including 200 unison studies and easy ensembles, 15 progressive ensemble pieces for class use, and 50 studies for individual practice for each instrument. In addition to its comprehensive text, the book is generously illustrated with numerous photographs and drawings that demonstrate good embouchure formation and playing position for each instrument.
