tools and methods from complex systems science can have a considerable impact on the way in which the quantitative assessment of economic and financial issues is approached as discussed in this thesis first it is shown that the self organization of financial markets is a crucial factor in the understanding of their dynamics in fact using an agent based approach it is argued that financial markets stylized facts appear only in the self organized state secondly the thesis points out the potential of so called big data science for financial market modeling investigating how web driven data can yield a picture of market activities it has been found that web query volumes anticipate trade volumes as a third achievement the metrics developed here for country competitiveness and product complexity is groundbreaking in comparison to mainstream theories of economic growth and technological development a key element in assessing the intangible variables determining the success of countries in the present globalized economy is represented by the diversification of the productive basket of countries the comparison between the level of complexity of a country s productive system and economic indicators such as the gdp per capita discloses its hidden growth potential

this volume explores several notable themes related to the economy in latin america and offers insightful historical perspectives to understand national regional and global issues in the continent since the beginning of the 20th century to the present day the collected essays focus on economic crises the relationship of growth models to society and politics the fluctuations of local economies and regional protests other aspects of consideration in this area include the evolution of integrated regional trading blocs the informal economy and the destruction of the productive potential that has had a serious social cultural and environmental impact the volume refuses to impose a traditional and uncritical linear historical narrative onto the reader and instead proposes an alternative interpretation of the past and its relation to the present
