form which leaves out much explanatory material between steps and as a result requires the reader to figure out the missing information this leaves the reader with an impression that the problems and even the subject are hard to learn completely the opposite of what an example is supposed to do poor examples are often worded in a confusing or obscure way they might not state the nature of the problem or they present a solution which appears to have no direct relation to the problem these problems usually offer an overly general discussion never revealing how or what is to be solved many examples do not include accompanying diagrams or graphs denying the reader the exposure necessary for drawing good diagrams and graphs such practice only strengthens understanding by simplifying and organizing accounting processes students can learn the subject only by doing the exercises themselves and reviewing them in class obtaining experience in applying the principles with their different ramifications in doing the exercises by themselves students find that they are required to devote considerable more time to accounting than to other subjects because they are uncertain with regard to the selection and application of the theorems and principles involved it is also often necessary for students to discover those tricks not revealed in their texts or review books that make it possible to solve problems easily students must usually resort to methods of trial and error to discover these tricks therefore finding out that they may sometimes spend several hours to solve a single problem when reviewing the exercises in classrooms instructors usually request students to take turns in writing solutions on the boards and explaining them to the class students often find it difficult to explain in a manner that holds the interest of the class and enables the remaining students to follow the material written on the boards the remaining students in the class are thus too occupied with copying the material off the boards to follow the professor's explanations this book is intended to aid students in accounting overcome the difficulties described by supplying detailed illustrations of the solution methods that are usually not apparent to students solution methods are illustrated by problems that have been selected from those most often assigned for class work and given on examinations the problems are arranged in order of complexity to enable students to learn and understand a particular topic by reviewing the problems in sequence the problems are illustrated with detailed step by step explanations to save the students large amounts of time that is often needed to fill in the gaps that are usually found between steps of illustrations in textbooks or review outline books the staff of rea considers accounting a subject that is best learned by allowing students to view the methods of analysis and solution techniques this learning approach is similar to that practiced in various scientific laboratories particularly in the medical fields in using this book students may review and study the illustrated problems at their own pace students are not limited to the time such problems receive in the classroom when students want to look up a particular type of problem and solution they can readily locate it in the book by referring to the index that has been extensively prepared it is also possible to locate a particular type of problem by glancing at just the material within the boxed portions each problem is numbered and surrounded by a heavy black border for speedy identification

excerpt from elementary accounting problems the added purpose and perhaps the more important is to show the application of accounting principles with this in view the problems have been developed logically following in the main the four prominent types of organization an effort has been made in the first eight or ten problems to show what the writer believes to be the evolution of the modern statement of income and profit and loss the text and comments will show the reasons which are believed to be responsible for its development the first group of the series deals principally with sole proprietorship the second covers copartnership and shows the conversion of the sole proprietorship into the copartnership the third group brings out the transition from copartnership to incorporation and the accounts and transactions which are common to corporations consolidations mergers holding companies or trusts form the subject matter of the fourth group because of the fact that the early problems appear very simple the impression should not be gained that they are all the same some of the subsequent problems will probably be found sufficiently difficult to interest the

keenest mind the comments have in places been left somewhat incomplete in order to stimulate original thought on the part of students and to offer an opportunity to instructors to bring out in demonstration the points passed over the form and arrangement of the financial statements used in the solutions of certain problems may be something of an innovation some of the statements will no doubt be startling no claim is made by the writer for their originality they are presented with full credit to every one with whom he has ever come in contact or received a thought or idea from and most especially the well known accounting firm with which he served his apprenticeship if the statements provoke discussion they will have served a purpose if the book succeeds in lighting the way for even one struggling student it will not have been in vain about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
