this book focuses on the diverse tapestry of families in contemporary u s culture each chapter explores a different kind of family and examines their specific communication behaviors we live in times of increasing diversity that complicate our understandings of ourselves as well as others who may be quite different from us these complexities also impact our definition of family in addition to our interpretation of family communication behaviors this book provides an examination of family communication practices in families that are underrepresented in the research of the discipline and underserved in u s culture immigrant families family members in interracial relationships lgbtq families low income latinx families families with an incarcerated parent and families headed by grandparents the book is an initial effort to expand the lens of family communication scholarship to focus on families on the margins through a variety of sometimes unique methods including textual analysis in depth interviews and analysis of art projects collected at a pride festival each chapter in this collection adds to our knowledge of how we define family and how families communicate in the 21st century the chapters in this book were originally published in a special issue of the journal of family communication

this open access book shows how expert consensus pervades all areas of science it explores in particular the role of consensus in establishing scientific truth in guiding professional practice and policy and agreeing on what are acceptable scientific methodologies for some scientific issues a consensus forms spontaneously among scientists working on a topic while for others where the issues are complex a formal deliberative consensus process is commonly needed deliberative consensus processes are becoming more important as scientists increasingly deal with complex multi disciplinary issues of policy importance such as climate change due to human activity while deliberative consensus processes are commonly used they often lead to criticism from consensus skeptics the book

argues that deliberative consensus processes in science can be improved and proposes a number of realistic ways forward ending with a discussion of whether communicating the scientific consensus on a topic is a good way to persuade the public

this book explores the key skills required helping trainees begin use them in their teaching reflect on their development of these skills with their mentors and evaluate their impact on learning

an index to library and information science literature

this series in three volumes considers maps as constructions resulting from a number of successive transformations and stages integrated in a logical reasoning and an order of choices volume 3 is exclusively focused on the new approaches on thematic cartography offered by the three successive revolutions affecting the discipline digital multimedia and the internet
