**I. Understanding the Foundation**

- Divergent Thinking** This involves expanding the range of possibilities, exploring multiple perspectives, and generating a wide array of ideas without immediate judgment. Think of it as brainstorming: the more ideas, the better, even if some seem outlandish.
- Convergent Thinking** This focuses on analyzing and evaluating the generated ideas, selecting the most promising ones, and refining them into workable solutions. This is where you choose the best ideas from your brainstorming session and refine them.

- Challenging Assumptions** Identify and question ingrained beliefs and assumptions about the problem. Often, the most innovative solutions arise from challenging the status quo. For example, Henry Ford's breakthrough wasn't simply improving the carriage but challenging the assumption that cars needed to be expensive luxuries.
- Reframing the Problem** Looking at the problem from different angles, perspectives, and contexts can reveal hidden possibilities. Instead of focusing on how to improve efficiency, reframe the problem as how to eliminate the need for efficiency altogether.
- Connecting Unrelated Ideas** Breakthroughs often emerge from the unexpected combination of seemingly unrelated concepts. Consider Velcro, inspired by burrs sticking to clothing. This
