certain things like justice have impersonal value other things like your parents carry personal values they have value for you besides whatever value they have they are valuable to you the philosophical literature as well as non philosophical literature is inundated with suggestions about the kinds of thing that are good for us or if it is a negative personal value what is bad for us this is a stimulating and vivid area of philosophical research but it has tended to monopolize the notion of good for linking it necessarily to welfare or well being since these more or less well grounded pieces of advice are seldom accompanied by an analysis of the notion of good for there is a need for such an analysis rønnow rasmussen remedies this need by offering a novel way of analyzing the notion of personal value he defends the idea that we have reason to expand our classical value taxonomy with these personal values by fine tuning a pattern of value analysis which has roots in the writings of the austrian philosopher franz brentano this sort of analysis will come to cover personal values too in addition rønnow rasmussen makes substantial contributions to a number of issues including hedonism vs preferentialism subjectivism vs objectivism value bearer monism vs value bearer pluralism and the wrong kind of reason problem all of which are much debated among today s value theorists
