the idea that home is a special place a separate place a place where we can be our true selves is so obvious to us today that we barely pause to think about it but as judith flanders shows in this revealing book home is a relatively new concept when in 1900 dorothy assured the citizens of oz that there is no place like home she was expressing a view that was a culmination of 300 years of economic physical and emotional change in the making of home flanders traces the evolution of the house across northern europe and america from the sixteenth to the early twentieth century and paints a striking picture of how the homes we know today differ from homes through history the transformation of houses into homes she argues was not a private matter but an essential ingredient in the rise of capitalism and the birth of the industrial revolution without home the modern world as we know it would not exist and as flanders charts the development of ordinary household objects from cutlery chairs and curtains to fitted kitchens plumbing and windows she also peels back the myths that surround some of our most basic assumptions including our entire notion of what it is that makes a family as full of fascinating detail as her previous bestsellers the making of home is also a book teeming with original and provocative ideas

the making of new world slavery argues that independent commerce geared to burgeoning consumer markets was the driving force behind the rise of plantation slavery the baroque state sought successfully to feed upon this commerce and with markedly less success to regulate slavery and racial relations to illustrate this thesis blackburn examines the deployment of slaves in the colonial possessions of the portuguese the spanish the dutch the english and the french plantation slavery is shown to have emerged from the impulses of civil society not from the strategies of individual states robin blackburn argues that the organization of slave plantations placed the west on a destructive path to modernity and that greatly preferable alternatives were both proposed and rejected finally he shows that the surge of atlantic trade predicated on the murderous toil of the plantations made a decisive contribution to both the industrial revolution and the rise of the west
