this book analyses the usefulness of terrorist profiling utilised by law enforcement officers
as a pre-emptive means to assist them in the detection prevention and deterrence of
terrorism and or its preparatory activities it explores two main themes arising from the
phenomenon of terrorist profiling the lawfulness of terrorist profiling and the utility of
profiling these two themes are explored in three separate parts firstly the book begins by
drawing upon human rights concerns arising from the use of terrorist profiling by law
enforcement officers secondly an analytical framework capable of making determinations
on the usefulness of terrorist profiling this framework develops a profiling spectrum that
ranges from formal and informal manifestations of terrorist profiling that forms the basis
for evaluating its usefulness finally the book presents an examination of various
manifestations of terrorist profiling by separating the analysis of the construction of
profiles on the one hand from their application on the other so as to be able to identify and
examine profiling's usefulness as a technique to assist law enforcement officers make
predictions about likely offender characteristics this book ultimately concludes that
terrorist profiling should only be conducted by undertaking a systematic assessment of
the construction of profiles separate from the application of profiles whilst simultaneously
taking into account fundamental human rights concerns with the practice of terrorist
profiling the work will be an essential resource for academics law enforcement officers

and lawyers in the disciplines of law criminology human rights criminal justice and policing as the book engages with terrorist profiling it will also be of interest to those engaged in the psychology of terrorism
