Jim Collins international bestselling author of Good to Great offers transformative lessons on constructing and reconstructing a life through the cliff moments and transitions we all will face repeatedly in our lives. What to Make of a Life: It is a question we all wrestle with more than once: how do we find our way in the world? How do we make it past the cliffs? Significant events that can radically change a life. How do we keep the inner fire burning bright long and late? Inspired by relentless curiosity, Jim Collins devoted a decade to studying these questions and to minutely analyzing those moments when life flips from clarity to confusion and casts us into a befuddling fog. His exploration follows various lives side by side, paired together at cliffs and analyzes the different choices made and divergent paths taken. Two rock musicians confronting a future without the group that had brought them success. Two public figures tainted by scandal having to make decisions about how to rebuild their lives. Two suffragists achieving their epic goal and so left with the puzzle of what to do next. Two figure skaters seeking new purpose when their Olympic careers come to an end. What emerges from Collins's extensive studies of writers, actors, scientists, leaders, and many others is a framework for understanding how individual lives can be built, sustained, and constantly renewed by examining the long arc of these remarkable lives. Collins tackles life's questions: What does it take to discover a deeply fulfilling role in life, one that you are naturally encoded for, and then to find a

second one if the first one ends overcome a major cliff a fracture point that forces choices about what's next and calls for you to re-envision the years to come make your personal economics work so that you can focus on one big thing that feeds your inner fire navigate the fog when you feel uncertain or even outright lost and build confidence step by step build personal momentum decade upon decade so that your most creative and energetic years are spread across an entire lifetime achieve the imperative to know thyself and apply self-knowledge to each phase of life and for the first time Collins movingly chronicles his own story to reveal how undertaking this project transformed him changing his thinking and reshaping his emotions in fundamental ways surprising story driven deeply researched and uplifting what to make of a life is a book like no other convincingly showing how a richly fulfilled life is within reach of us all

the challenge built to last the defining management study of the nineties showed how great companies triumph over time and how long term sustained performance can be engineered into the dna of an enterprise from the very beginning but what about the company that is not born with great dna how can good companies mediocre companies even bad companies achieve enduring greatness the study for years this question preyed on the mind of jim collins are there companies that defy gravity and convert long term mediocrity or worse into long term superiority and if so what are the universal distinguishing characteristics that cause a company to go from good to great the standards using tough benchmarks collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years how great after the leap the good to great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years better than twice the results delivered by a composite index of the world's greatest companies including coca cola intel general electric and merck the comparisons the research team contrasted the good to great companies with a carefully selected set of comparison companies that failed to make the leap from good to great what was different why did one set of
