business analysis and valuation ifrs edition richly informs on contemporary financial statement data use in various valuation tasks balancing each
concept against real life scenarios the text is entirely ifrs based and discussed how to get the most information out of ifrs based financial
statements the focus is not only on building a solid understanding of the latest theoretical approaches but to also place students in a confident
position to apply them

the new edition of business analysis and valuation builds on the strong success of the first ifrs edition providing students with the knowledge of how to use financial statement information to assess a firm's financial performance value and creditworthiness the text is primarily aimed at masters and upper level undergraduate programs in business and builds a bridge between accounting and finance therefore making it accessible to both finance and accounting students the distinctive strengths of this text include a large number of real world cases used to illustrate theory the step by step analysis methodology and the extensive discussion of strategy analysis the presentation of material is based on business analysis before financial analysis which ensures that financial analysis is approached in a real world manner and is driven by strategy the pedagogy is geared toward helping students to develop strong practical skills using current applications and supported by the extra interactive material on the companion website this new edition retains some of the most popular harvard cases from the previous edition alongside new harvard cases and a range of long and short cases on european and international companies written by the adapting author erik peek

written as a text for masters and upper level undergraduate programmes in business teaches how to use financial statement information to assess a firm's financial performance value and creditworthiness includes real world cases to illustrate theory the step by step analysis methodology and discussion of strategy analysis

financial statements are the basis for a wide range of business analysis managers securities analysts bankers and consultants all use them to make business decisions there is strong demand among business students for course materials that provide a framework for using financial statement data in a variety of business analysis and valuation contexts business analysis valuation using financial statements text cases 4e allows you to undertake financial statement analysis using a four part framework 1 business strategy analysis for developing an understanding of a firm's competitive strategy 2 accounting analysis for representing the firm's business economics and strategy in its financial statements and for developing adjusted accounting measures of performance 3 financial analysis for ratio analysis and cash flow measures of operating and 4 prospective analysis then you'll learn how to apply these tools in a variety of decision contexts including securities analysis credit analysis corporate financing policies analysis mergers and acquisitions analysis and governance and communication analysis

business analysis and valuation teaches students how to use financial statement information to assess a firm's financial performance value and

creditworthiness this new ifrs edition has been adapted and developed by erik peek of maastricht university the text is primarily aimed at masters and upper level undergraduate programs in business and builds a bridge between accounting and finance therefore making it accessible to both finance and accounting students the distinctive strengths of this text include a large number of real world cases used to illustrate theory the step by step analy

now in its sixth edition business analysis and valuation ifrs standards edition has successfully taught students how to interpret ifrs based financial statements for more than twenty years with the help of international cases the authors illustrate the use of financial data in various valuation tasks and motivate students to build a thorough understanding of theoretical approaches and their practical application

this book provides an easy to follow introduction to the principal methods of property valuation in australia within the context of international valuation standards so bridging the gap between traditional property valuation methods and the modern era of global valuation governance providing a framework for valuation practice the book outlines the property asset class the role of valuation concepts of value and valuation standards before focusing on the instructing undertaking and reporting aspects of the valuation process the market approach to valuation is addressed through the comparative method of valuation with the income approach addressed through the capitalisation of income discounted cash flow and profits methods of valuation and the cost approach addressed through the replacement cost reproduction cost and residual or hypothetical development methods of valuation as an introductory textbook on property valuation methods this book is a companion to australia s leading advanced valuation textbook principles and practice of property valuation in australia edited by the same author and also published by routledge which is a more advanced text considering key principles underlying property valuation and current techniques and issues in the practice of property valuation for major sectors of the australian property market the most up to date valuation text book for the australian market this book will appeal to both valuation practitioners and undergraduate postgraduate students as well as to accountants auditors lawyers lenders and all professionals dealing with property valuation issues

academics and practitioners argue that intangible values have become significant value drivers of today s economy major production inputs no longer comprise of property plant and equipment but rather of brands knowledge and other technological innovation based on this notion

information on such phenomena is supposedly crucial for existing and potential capital providers in making decisions whether to allocate resources to a company this thesis examines the information use and needs of financial analysts with respect to intangible values the purpose is to shed light on the usefulness of such information from the perspective of one of the primary user groups of ifrss

the only local text in the market business analysis and valuation provides a framework for understanding and using financial statements for business students and practitioners developed specifically for students undertaking accounting valuation subjects the text is unique in its approach which introduces and develops a framework for business analysis and valuation using financial statement data then shows how to apply this framework to a variety of decision contexts all chapters of this edition have been updated to include the latest regulations practices and examples from both the financial markets and research industry insights from practitioners and other experts have been added to each chapter giving students a practical real life understanding of how the content they are learning translates to the workplace with an increased number of real business asia pacific case studies exploring various issues including a running chapter example and references to recent research in this field the text offers local context and a practical and in depth approach

international financial reporting standards ifrs are now mandatory in many parts of the world including europe australia and china in addition many countries are in the process of ifrs adoption lastly foreign registrants in us companies no longer have to undertake a costly us ifrs reconciliation therefore it is clear that investors analysts and valuers need to understand financial statements produced under ifrs to feed in to their valuations and broader investment decisions written by practitioners for practitioners the book addresses valuation from the viewpoint of the analyst the investor and the corporate acquirer it starts with valuation theory what is to be discounted and at what discount rate it explains the connection between standard methodologies based on free cash flow and on return on capital and it emphasizes that whichever method is used accurate interpretation of accounting information is critical to the production of sensible valuations the authors argue that forecasts of cash flows imply views on profits and balance sheets and that non cash items contain useful information about future cash flows so profits matter the book then addresses the implications for analysis and valuation of key aspects of ifrs including pensions stock options derivatives provisions leases the text also sets out which countries use gaap as well as the key differences between ifrs and us gaap treatments of these issues in addition to their implications for analysis a detailed case study is used to provide a step by step valuation of an industrial company using both free cash flow

and economic profit methodologies the authors then address a range of common valuation problems including cyclical or immature companies as well as the specialist accounting and modelling knowledge required for regulated utilities resource extraction companies banks insurance and real estate companies accounting for mergers and disposals is first explained and then illustrated with a detailed potential acquisition using real companies

intermediate accounting continues to be the gold standard when it comes to helping students connect the what how and why of accounting through strategic content updates and the integration of a clear student friendly pedagogy the 19th edition offers a refreshed modern approach designed to spark effective learning and inspire the next generation of accounting professionals with this new edition the authors have focused on enhancing the readability and accessibility of the text while also ensuring the inclusion of cutting edge topics conversations on esg crypto assets and emerging technologies like ai have been added to drive student engagement and increase the connection between concepts learned in class and their relevance to the industry today to help students move beyond rote memorization and into a deeper understanding of course concepts intermediate accounting integrates practice opportunities at the point of learning the end of chapter materials feature a wealth of high quality assessment questions as well including brief exercises exercises analysis problems short answer questions and multiple choice questions these problems are scaffolded in difficulty to better support student learning and often involve the application of key concepts into real world scenarios students will also have the chance to work through various hands on activities including critical thinking cases excel templates and analytics in action problems all within the chapter context these applications help students develop a deeper understanding of course material while building confidence in their critical thinking and decision making skills
