in commerce many moral failures are due to narrow mindsets that preclude taking into account the moral dimensions of a decision or action in turn sometimes these mindsets are caused by failing to question managerial decisions from a moral point of view because of a perceived authority of management in the 1960s stanley milgram conducted controversial experiments to investigate just how far obedience to an authority figure could subvert his subjects moral beliefs in this thought provoking work the authors examine the prevalence of narrow mental models and the phenomenon of obedience to an authority to analyse and understand the challenges which business professionals encounter in making ethical decisions obstacles to ethical decision making proposes processes including collaborative input and critique by which individuals may reduce or

overcome these challenges it provides decision makers at all levels in an organisation with the means to place ethical considerations at the heart of managerial decision making

it is the purpose of this book to examine how ethical and unethical decisions actually do get made by individuals in the context of their organizations interactive ethics discourages the idea that ethical decisions are made through a carefully thought out systematic process the interactive ethics model iem lays out a descriptive model describing how events unfold as the participants proceed from the ethical dilemma to the finally ethical or unethical outcome the iem proposes to explain how ethical and unethical decisions really get made by individuals in the context of the workplace this is not the ethical decision making process itself mapped out but it is the emotional fuel that moves everyone toward an outcome while dilemmas are tough and complex it seems to be assumed that a proper understanding of ethical principles supported by a carefully written code and application of a decision making process will quite naturally lead to the right outcome this may be true but the fact remains that some organizations consistently make unethical decisions that some have greater struggles than others when faced with a dilemma and that some are not consistent in their decision making the iem suggests there is more going on that there are reasons that both ethical and unethical decisions get made one way of putting it is that we first react to a dilemma based on our emotions and we then seek a reasonable sounding justification for our actions put another way dealing with ethical or moral situations do not build character instead it reveals the character of both the individuals and the organization involved

the rapidly growing recognition of the importance of emotion in understanding all aspects of organizational life is facilitating the development of focused areas of scholarship this volume includes articles which represent a selection of the papers presented at the sixth international conference on emotions and organizational life

organizational decision making and ethics have often been treated as different topics this separation impacts both the ethical quality of decisions and the quality

of ethical decisions decision analysis provides a wealth of tools that can help decision makers achieve clarity of action and can capture uncertainty and preferences in decisions with ethical implications further decision analysis provides many insights into decision traps that are relevant to decisions with and without ethical implications decision analysis also highlights situations where individuals become reluctant to change a course of action because of the sunk cost bias even if a change is appropriate and even if it has ethical implications despite these and many other well known human biases in decision making decision analysis has not been fully integrated into the teachings of ethics on an organizational level teaching ethics without a focus on decision analysis can render the teachings irrelevant to organizational decisions and can steer the focus towards deterministic reasoning that overlooks uncertainty and ignores a wealth of knowledge on traps biases and normative methods for making decisions this book is written for anybody interested in learning about and researching ethical decision making it can be used in classroom discussions that combine ethics and organizational decision making it is also particularly relevant for mba and executive mba programs
