this book shows how the change of water paradigm has become urgent and provides evidence for new policies that expand water
balance to green and virtual water the issue of water security concerns drinking water supply but also food safety linked to agricultural
policy both rain fed and irrigated agriculture play complementary roles in food security and the water issue implies a holistic view of
water resources this view constitutes the book s backstory the reader will find original ideas that can be applied everywhere because
the example of tunisia is typically a basis to illustrate a universally prevalent situation the book deals with other important issues
desalination wastewater recycling water quality groundwater overdraft water savings governance knowledge valuing education
information upgrading the whole water systems for the future implies emancipation of the whole society
