

By Alasdair Drysdale The Financial Controller The Things The Academics Dont Teach You

By Alasdair Drysdale The Financial Controller The Things The Academics Dont Teach You The Things They Dont Teach You A Financial Controllers Perspective As a seasoned Financial Controller Ive spent years navigating the often complex world of finance While academia offers a solid foundation realworld experience teaches you things that textbooks simply cant Here are some of the key lessons Ive learned along the way

Beyond the Numbers The Art of Storytelling

- 1 Numbers are just data points They only gain meaning when woven into a compelling narrative Every report every spreadsheet needs a story to back it up Whether youre presenting to investors board members or even your own team you need to paint a picture with the data highlighting trends explaining variances and ultimately driving action
- 2 Master the language of business Financial jargon can be intimidating but understanding it is essential for effective communication Learn to speak the language of your stakeholders using clear and concise terms to ensure everyone is on the same page
- 3 Focus on the why not just the what Numbers tell a story but its your job to explain the underlying reasons Why did sales decline Why did expenses increase By digging into the root cause you can provide actionable insights and drive positive change

The Human Element in Finance

- 1 Finance is not just about spreadsheets Its about people Youre dealing with real individuals with diverse motivations and perspectives Understanding these nuances will help you build trust and create more productive relationships
- 2 Soft skills matter Strong communication active listening and conflict resolution are essential for success Being able to build consensus navigate disagreements and work collaboratively is vital in any financial role
- 3 Empathy is your superpower Put yourself in the shoes of your colleagues understanding their pressures and challenges This empathy will help you build bridges and create a more supportive environment

Mastering the Art of the Possible

- 1 Never stop learning The world of finance is constantly evolving Stay ahead of the curve by attending conferences reading industry publications and embracing new technologies
- 2 Think outside the box Challenge the status quo and be willing to experiment with new ideas Dont be afraid to break the mold and find creative solutions to complex problems
- 3 Be adaptable and resilient

Markets fluctuate regulations change and unexpected challenges arise The ability to adapt and navigate these obstacles is essential for success The Unsung Heroes of Finance 1 Details matter Attention to detail is paramount in finance Errors can have significant consequences so its essential to be meticulous in your work 2 Dont be afraid to ask questions Its better to ask for clarification than to make assumptions Always seek to fully understand the information youre working with and dont be afraid to ask for guidance when needed 3 Embrace the mundane The daytoday tasks might not be glamorous but they are crucial to the smooth functioning of the department Take pride in your work and be reliable in your duties even when they seem repetitive Final Thoughts While academia provides a solid foundation realworld experience teaches you the true essence of finance Its about understanding the big picture mastering the art of communication and building strong relationships with your colleagues Its about being adaptable detailoriented and constantly learning Above all its about using your knowledge and skills to contribute to the success of your organization By embracing these lessons you can truly thrive in the world of finance and become a valuable asset to any company

playing the academic game is the culmination of two years of weekly posts on the brynstorming blog by bryn williams jones professor of bioethics in the school of public health at the université de montréal as an ethicist long interested by questions of justice an important motivator for this project has been williams jones need to respond to the injustices encountered in academia many students and researchers fail in their studies or career progression not because they don t have the intellectual abilities or drive but simply because they don t know what s expected of them or how to best present themselves in a competitive environment that is they don t know the rules of the game and this isn t fair because the rules are rarely made explicit in this book which is organized into 5 major sections the academic career path professional identity university life productivity and creativity and multiple responsibilities and mental health williams jones shares 30 years of experience in academia to make explicit the often implicit norms and rules of academic life so that all who wish to can fairly play the academic game

this book is a report on the academic achievement assessment of grade 6 students in primary school with a large scale sample for the first time since the new curriculum reform this report consists of the general report reports on the four subjects of chinese mathematics science and morality and society the questionnaire survey report and assessment instruments this report states the complexion of students academic achievement including achievements and shortcomings and proposes some targeted suggestions the methods and assessment instruments have important reference value

for future academic achievement assessment

in greek scepticism leo groarke presents a more sympathetic and accurate account of greek scepticism and its relevance to modern and contemporary thought he begins with an account of the development of scepticism in pre socratic times and concludes with a discussion of the relationship of scepticism to modern and contemporary epistemology groarke argues that the sceptics posed the problems central to both ancient and modern epistemology and that in fact scepticism is the ancient analogue of anti realist trends which are thought to be uniquely modern he also shows that scepticism is not simply negative but offers a positive philosophy which mitigates the sceptical critique of knowledge greek scepticism undermines our usual account of the development of modern epistemology groarke shows that the separation of the mind and the external world that is generally attributed to descartes is actually an integral part of ancient scepticism in discussing the major problems that stem from this distinction ancient scepticism anticipates thinkers such as berkeley kant and hume groarke maintains controversially that the doubts of the ancient sceptics are deeper and epistemologically more significant than those of the philosophers usually discussed today

academia versus the world outside lays out the givens of the knowledge industry located within the ivory tower colleges and universities it then moves outside academia to consider this restricted world the way most people see it the contrast between these two views of academia explains and is at the basis of the left right animosity of our day the knowledge industry a creation of the post enlightenment modern age along with other industrial and post industrial enterprises is based on creating and adding to a store of knowledge as its own end this makes academia alien to the more random and personal nature of knowledge acquisition in our everyday lives as indeed every industry is alien to everyday life in the modern age yet most academics are so immersed in the peculiar project they have chosen as their life s work that they are either unaware of or unsympathetic to the fact that people outside live very different lives with very different presuppositions most non academics for their part find academia strange and for very good reason academia versus the world outside makes this contrast and conflict clear from both directions this book is aimed primarily at academics most of whom so take for granted the givens of what they do that they fail to understand why the vast majority of people outside find academia alien this has led to an increasingly hostile and utterly predictable left right political conflict academia

tending increasingly left and the world outside increasingly right the goal of this book is to reduce the tension between both sides if read by non academics this book may help these understand the givens of a world as strange to everyday life as any other specialized industry in the modern age

knowledge from plato onwards has been considered in relation to justified belief current debate has centred around the nature of the justification and whether justified belief can be considered an internal or external matter epistemological internalists argue that the subject must be able to reflect upon a belief to complete the process of justification the externalists on the other hand claim that it is only necessary to consider whether the belief is reliably formed and argue that the ability to know by reflection is not required for a justified belief in the historical section of this book the three most important epistemologists plato descartes and hume as well as the ancient epistemologies of the stoics academics and pyrrhonians are considered in reconsidering the history of epistemology the author is led to argue against the view that internalism is historically dominant his critique of internalism is then developed into a sustained argument against many of its forms and he goes on to defend an externalist reliabilist epistemology

this text questions the differences between female and male literature taking the view that the difference lies not within the writing itself but in the response to the writing the author writes that men have been in charge of according value to literature and that they have found the contributions of their own sex immeasurably superior the author presents evidence for a form of literary criticism which takes account of the exploitative practices of men

this is a student's guide to the life and work of augustine a notoriously challenging thinker widely read in philosophy and christian theology the book provides a concise and coherent overview of augustine introducing all the key concepts and themes and is ideal for undergraduates who require more than just a simple introduction to his work and thought

first series books 1-43 includes notes on u.s. reports by walter malins rose
