une **valuation** efficace de la performance des **systèmes** éducatifs est un **élément** clé de l'élaboration des politiques visant à optimiser le **développement** du capital humain dans le monde. Les cinq volumes de la **série** de **valuations nationales** des **acquis scolaires** introduisent des concepts clés des **valuations nationales** des niveaux de performance des **élèves** depuis les questions de politiques à traiter pendant la conception et la **réalisation** des **valuations** jusqu'à la mise au point des tests. L'échantillonnage, le nettoyage des **données** et les statistiques, la **réaction** des rapports et l'utilisation des **résultats** pour améliorer la **qualité** de l'éducation, analyser les **données** issues d'une **valuation nationale** des **acquis scolaires** est le quatrième des cinq volumes de la **série** de **valuations nationales** des **acquis scolaires**. Les autres volumes ont décrit les procédures d'une **valuation** jusqu'au stade où les **données** ont été traitées pour l'analyse statistique, le sujet de ce volume est l'analyse des **processus** effectués pendant les besoins en information des responsables des politiques et des gestionnaires de l'éducation dans la plupart des **valuations nationales**. Ces besoins ont trait à la **qualité** des **acquis** des **élèves** aux facteurs liés à l'apprentissage aux questions d'écriture et dans certains cas à l'évolution du rendement de l'élève au fil du temps. Le volume 4 qui comprend deux parties de taille égale par rapport à la partie 1, offre une présentation générale des analyses statistiques généralement effectuées dans les **valuations**. La partie 2 est grande et complète pour mesurer la tendance centrale et la dispersion des scores des **élèves**, ainsi que les relations entre les variables. La partie 3 décrit le logiciel **iata item and test analysis** qui utilise la théorie classique des tests et celle de la **réponse à l'item** pour déterminer des échelles pour les scores des **élèves**. Les étapes de l'analyse des **données** issues de l'administration des tests pilotes et final sont décrites en détail. Un CD d'accompagnement contient des exercices supplémentaires concernant les fichiers de **données** correspondants pour les deux parties du volume. Cet ouvrage sera d'un intérêt certain pour les spécialistes de la **valuation** appartenant aux pouvoirs publics nationaux et locaux, ainsi que pour les institutions de recherche et les universités.

The volume presents the results of a research project named **legafight** funded by the Luxembourg **fond national de la recherche** in order to verify if and how digital tracing applications could be implemented in the Grand Duchy in order to counter and abate the COVID-19 pandemic. This inevitably brought to a deep comparative overview of the various existing models starting from that of the European Union and those put into practice by Belgium, France, Germany and Italy, with attention also to some Anglo-Saxon approaches. The UK and Australia, not surprisingly, the main issue which had to be tackled was that of the protection of the personal data collected through the tracing applications, their use by public health authorities and the trust laid in tracing procedures by citizens over the last 18 months. Tracing apps have registered a rise, a fall and a sudden rebirth as media devoted not so much to collect data but rather to distribute real time information which should allow informed decisions and be used as repositories of health certifications. doi: 10.13134/979.12.5977.0554

The extent of the contributions made by the international echinoderm conferences to various fields of research is attested by the scope covered by presentation at the international conferences. These proceedings contain the complete papers or abstracts of all the presentations and posters presented at the eighth international echinoderm conference held in Dijon, France in September 1994. Coverage includes general, extinct classes, crinoids, asteroids, ophiuroids, holothuroids and echinoids.
