teachers learning stories of science education is aimed at science educators who wish for a deeper understanding of how teachers learn to teach science and the role of stories in reporting science education research it is a fascinating look at the knowledge teachers have and use how context influences teachers work and the role of reflection and collaboration in teachers learning at the core of each chapter is a story or group of stories written by or about teachers these stories serve as a form of data to build a set of arguments about how science teachers grow and the possibilities for change in teaching this book is designed for all those involved in the science teaching enterprise pre service teachers graduate students and science education researchers are invited to utilise both the findings about teachers learning and the research processes employed to develop those findings

this book delves into einstein s fascinating although lesser known journey to malaya in 1922 and 1923 during a trip to japan at the end of 1922 einstein and his wife elsa stopped in colombo and singapore on their return in january 1923 they stopped at singapore malacca penang and colombo einstein s diary tells us about what he saw and the theories he was

working on while in malaya he wrote discovered a fly in my electricity ointment in the afternoon a pity true tropical heat in malacca 1923 and boats houses people they all have style in penang 1923 from insightful interaction with the locals to the breath taking tropical natural wonders that inspired him this book unravels the lesser known facets of einstein s visit to the malay archipelago

barbara arrowsmith young was born with severe learning disabilities that caused teachers to label her as slow stubborn or worse as a child she read and wrote everything backwards was physically uncoordinated and she continually got lost but by relying on her formidable memory and iron will she made her way to graduate school where she chanced upon research that inspired her to invent cognitive exercises to fix her own brain which we now now as neuroplasticity the woman who changed her brain interweaves barbara s personal story with riveting case histories from over thirty years of working with both children and adults at what became the arrowsmith school in toronto this remarkable book by a brilliant pioneer deepens our understanding of how the brain works our brains may shape us but this book offers clear and hopeful evidence of the corollary that we can shape our brains foreword by norman doidge m d author of the brain that changes itself

she d trade a minivan for a bachelorette pad at the ripe age of 25 johanna durbin had raised six siblings now on the verge of becoming carefree at last she met mr right rugged sensitive and available hunter pace was everything she was looking for except footloose and fancy free he d swapped his bachelor pad for a minivan with a brood of orphaned nieces and nephews under his roof hunter was fast becoming an expert on carpooling first aid and toothbrushes in the toilet but some things simply demanded a woman s loving touch hunter soon realized he was one of them could he convince johanna that his intentions were strictly honorable and very personal

this book is a printed edition of the special issue algorithms for scheduling problems that was published in algorithms

tate montgomery needed a new life and johanna patterson was the kind of woman who could make him leave the past behind but how would he ever convince this reclusive spinster to open up her heart to him and his boys it seemed to johanna that she had always been alone until the day that tate montgomery turned up at her farm with a ready made family and an offer that would change her life forever

on the threshold of the 3rd millennium there can be no doubt about the fact that advances progress of modern society are technology driven there is still an ever increasing demand for engineers at many different levels nonetheless the skills and attitudes required of them are constantly changing given that they must match developments which take place at an ever increasing rate hence engineering educators and to greater extent all stake holders in the world of scientific and technological training are looking forward to the model of a more flexible inter disciplinary shaped and innovation oriented kind of engineers perhaps an artist engineer is the ideal model what we refer to as the renaissance engineer of tomorrow

a suitable one for the today times does such a model exist at all and if yes does it really satisfy the needs of our society the 30th sefi annual conference is a forum which is open for the development of such a discussion amongst scientists educators professionals industrialists students and all those involved and or interested in the debate primarily its purpose is to better identify and re shape our concept of the ideal engineer as envisaged for the future no matter how we call such model such a concept involves the ability to manage interaction between the many different branches of scientific and technical knowledge as well as the skills associated with the adaptability and flexibility to handle tasks in a truly innovative manner coupled with the positive attitude of life long learning ethical awareness and respect in our approach to a sustainable and socially committed development etc all the above issues clearly define the profile of a graduate far beyond the limited interpretation of the anglo saxon word engineer i e challenging himself to change his her perception of his her role in the design process as one moves beyond the simple act of making decisions based on codes and calculations all this requires a multi cultural education enriched through mobility during one s period of study a marked team work attitude in an international environment the acceptance of challenging competitiveness in terms of ideas and improved efficiency of both processes and products how does one go about developing all these graduate skills through a simple engineering degree and how to solve the evident contradiction between the aspiration to educate an artist engineer necessarily an elitary group and the need of delivering a suitable technical education to the many young people who are requested in engineering such to allow them to work and correctly and safely produce for the society more than 120 contributions responded to sefirenze 2002 call for papers form 30 different countries almost all over the world their presence highlights the interest that the evocative issue of the renaissance engineer of tomorrow has drawn everyone is dreaming something figuring out his her own idea of the task and handbut perhaps no single individual can really define what it is exactly let us therefore dream of our future engineers as people who will work with respect and awareness of different traditions and heritage let us envisage them as human bridges across different cultures and regions linking people all over the world by means of science and technology in this way we can draw inspiration from our glorious roman past which teaches us that the highest authority the pontiff took his privileged title from pontifex maximus the ancient latin pontesfacere i e the bridge maker claudio borri

a revision of the author s thesis sydney 1967

first published in france this harrowing tale of a 12 year old girl s nightmare journey home through the firebombed streets of dresden is a testament to man s dignity in the face of the senseless cruelty of war
