this book reports research on the problem solution rhetorical pattern which has to date received very little attention in corpus based studies insights from genre analysis and systemic functional grammar are also applied to the analysis of the problem solution pattern thus moving towards a more multi faceted analysis of corpus data the pattern is investigated in two specialized corpora of technically oriented report writing a professional corpus and a student corpus using a key word and key key word analysis phraseological analyses of key words in both corpora are presented data show that students writing lacks a range of lexico grammatical patternings for expressing the problem and solution elements of the pattern the book concludes with some pedagogic implications and applications of the findings suggested concordancing activities are discussed within the context of key issues in the field of data driven learning

this third volume of problems from the william lowell putnam competition is unlike the previous two in that it places the problems in the context of important mathematical themes the authors highlight connections to other problems to the curriculum and to more advanced topics the best problems contain kernels of sophisticated ideas related to important current research and yet the problems are accessible to undergraduates the solutions have been compiled from the american mathematical monthly mathematics magazine and past competitors multiple solutions enhance the understanding of the audience explaining techniques that have relevance to more than the problem at hand in addition the book contains suggestions for further reading a hint to each problem separate from the full solution and background information about the competition the book will appeal to students teachers professors and indeed anyone interested in problem solving as a gateway to a deep understanding of mathematics

yes we can have our cake and eat it too we can improve students reading and writing performance without sacrificing authenticity in read talk write laura robb shows us how first she makes sure students know the basics of six types of talk next she shares 35 lessons that support rich conversation finally she includes new pieces by seymour simon kathleen krull and others so you have texts to use right away read talk write it s a process your students not only can do but one they will love to do
