what are the long term causes and consequences of the global financial crisis of 2007 2008 this book offers a fresh perspective on these issues by bringing together a range of academics from law history economics and business to look in more depth at the changing relationships between crises and complexity in the us and uk financial markets the contributors are motivated by three main questions is the present financial system more complex than in the past and if so why to what extent and in what ways does the worldwide financial crisis of 2007 2008 differ from past financial crises how can governments regulators and businesses better manage and deal with increased levels of complexity both in the present and in the future students and scholars of finance economics history financial law banking and international business will find this book to be of interest it will also be of use to regulators and policymakers involved in the us and uk banking sectors

bernd wübben analyzes the success of 87 german mergers and acquisitions in the usa during the period from 1990 to 2004 employing a study of the capital markets reaction and a survey of acquirers executives he shows that us transactions on average enhanced value for german companies and their shareholders the author integrates the findings of both

methodologies to identify the determinants of transaction success including characteristics of the german acquiring and the us target companies as well as of the acquisition structure and management
