**I. The Structure of a Typical DeMello Case**

DeMello's cases typically follow a narrative structure, presenting a realistic business dilemma faced by a company or individual. This narrative includes:

- Company Background:** A comprehensive overview of the firm's history, industry, competitive landscape, and financial performance.
- Specific Problem Statement:** A clearly defined challenge requiring a financial solution. This could involve capital budgeting, mergers and acquisitions, valuation, risk management, or financial distress.
- Relevant Financial Data:** A rich dataset of financial statements, market data, industry benchmarks, and other pertinent information. This data often requires careful scrutiny and manipulation to derive meaningful insights.

**Multiple Perspectives:** The cases frequently present conflicting viewpoints from different stakeholders, e.g., management, shareholders, creditors, complicating the decision-making process.

**II. Analytical Frameworks Employed Solving DeMello's cases necessitates a robust understanding and application of various financial frameworks. These include:**

- Time Value of Money (TVM):** Fundamental to many case studies, particularly those involving capital budgeting and investment decisions.
- Discounted cash flow (DCF) analysis:** net present value (NPV) and internal rate of return (IRR) calculations are frequently employed.
- Capital Structure:** Cost of Capital Understanding the optimal capital structure and 2 accurately determining the weighted average cost of capital (WACC) is crucial for valuation and investment appraisal.
- Valuation Techniques:** Various valuation methods, including discounted cash flow (DCF), comparable company analysis, and precedent transactions, are applied to assess the value of assets, companies, and projects.
- Financial Statement Analysis:** A thorough understanding of financial statements, balance sheet, income statement, cash flow statement, is essential to identify key financial ratios, trends, and potential problems.
- Risk Management:** Many cases involve evaluating and mitigating various types of financial risks, including market risk, credit risk, and operational risk.
