the book traces the evolution of men's, women's, and children's clothes throughout the 19th century during which sweeping social changes were reflected in contemporary fashions

During the nineteenth and early twentieth centuries the production of dress shifted dramatically from being predominantly hand crafted in small quantities to machine manufactured in bulk. The increasing democratization of appearances made new fashions more widely available but at the same time made the need to differentiate social rank seem more pressing. In this age of empire the coding of class, gender, and race was frequently negotiated through dress in complex ways from fashionable dress which restricted or exaggerated the female body to liberating reform dress from self-defining black dandies to the oppressions and resistances of slave dress. Richly illustrated with over 100 images and drawings on a plethora of visual, textual, and object sources, a cultural history of dress and fashion in the age of empire presents essays on textiles, production and distribution, the body, belief, gender, and sexuality, status, ethnicity, and visual and literary representations to illustrate the diversity and cultural significance of dress and fashion in the period.

Corpus linguistics seeks to provide a comprehensive sampling of real life usage in a given language and to use these empirical data to test language hypotheses. Modern corpus linguistics began fifty years ago but the subject has seen explosive growth since the early 1990s. These days corpora are being used to advance virtually every aspect of language study from computer processing techniques such as machine translation to literary stylistics, social aspects of language use and improved language teaching methods. Because corpus linguistics has grown fast from small beginnings, newcomers to the field often find it hard to get their bearings. Important papers can be

difficult to track down this volume reprints forty two articles on corpus linguistics by an international selection of authors which comprehensively illustrate the directions in which the subject is developing it includes articles that are already recognized as classics and others which deserve to become so supplemented with editorial introductions relating the individual contributions to the field as a whole this collection of readings will be useful to students of corpus linguistics at both undergraduate and postgraduate level as well as academics researching this fascinating area of linguistics
