the allied invasions of sicily and the italian mainland had been met with tenacious resistance by the germans but the defense consisted for the most part of armored units that were little different to those the british had faced in north africa but in early 1944 with the landings at anzio and nettuno and the attempt to bypass the german defensive line the wehrmacht s high command began shipping heavier and more powerful tanks to the southern front including an increasing number tigers and panthers the initial models of the latter had gone into combat for the first time in july 1943 and it was planned that every panzer regiment would eventually contain a battalion of these impressive vehicles drawing on official documentation and unit histories dennis oliver investigates the formations that operated these deservedly famous vehicles and uses archive photos and extensively researched color illustrations to examine the markings camouflage and technical aspects of the pzkwf v tanks that wee an integral part of the german defense of the italian peninsula a key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales technical details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of these historic vehicles

explores the evolution use and technical details of the german sturmgeschütz assault guns during world war ii focusing on the eastern front

every general s aim is to end a war by christmas and montgomery perhaps saw his opportunity in a bold strike across the southern portion of the netherlands close to the borders of an embattled reich still heady from earlier victories in the normandy campaign the plan to push deep into enemy territory with land and airborne forces was as daring as it was dangerous some would say the furthest objective arnhem bridge was a bridge too far separated into two distinct elements market the airborne assault was designed to capture the vital bridges across the many rivers and canals that were needed garden the ground assault would ensure the bridges were soon part of a wider allied salient however planning and intelligence was as not as thorough as it had been in previous operations and market garden turned from glorious adventure with easily achievable aims to an almost devastating defeat this battle craft title also looks at four pieces of military hardware that were involved in these

legendary battles representing the land forces are the triumph of the motorcycle dispatch riders, the stalwart and the unique German Sd Kfz 2 Kettenkrad. These amazing machines were vital in maintaining lines of communications on the main route of the march. The state of the art British Cromwell duelled valiantly against the deadly Panther. The Quartermaster section provides the modeller with an insight into the development and operational use of the four chosen vehicles that were involved in Market Garden. A selection of historical and contemporary photos and illustrations feature alongside a stunning showcase of builds, providing the modeller with subjects to whet the creative appetite. It also features details of model kits and extras that can really help the modeller bring military history to life.

A key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales. Originally developed to support the infantry formations of the German's armored divisions, the PzKpfw IV medium tank was increasingly pressed into service as a tank killer as stronger and more well-armored enemy vehicles were encountered by the end of 1943. Despite the appearance of the Tiger and Panther, it could be said that the PzKpfw IV was the most important tank at least numerically in the Wehrmacht's arsenal. Mechanically reliable and relatively cheap to produce, the tank's large wheel base and turret circumference meant that it could be up-gunned with minimal disruption to production and adapted to a number of different roles including self-propelled anti-tank gun, anti-aircraft tank, bridgelayer and armored recovery vehicle. Although assembly of the PzKpfw IV was officially terminated in late 1944 as the tank had fallen out of favour with Hitler, production was soon resumed and continued until the final days of the conflict. In Dennis Oliver's latest volume in the Tankcraft series, he uses archive photos and extensively researched color illustrations to examine the later models of the PzKpfw IV tank and the units that operated this deservedly famous armored vehicle during the savage defensive battles against the Soviet Army on the Eastern Front in the last months of the war. A key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeller needs to recreate an accurate representation of these historic tanks. Dennis Oliver is the author of over twenty books on Second World War armored vehicles, including Panzer IV Medium Tank, German Army and Waffen

the pzkw iii tank was the mainstay of the panzer divisions during the blitzkrieg era and made up the bulk of the armored force sent to north africa although less heavily armored than many of its opponents it was sturdy and reliable and its main armament was the equal of any enemy weapon it was called upon to face operating in one of the most inhospitable environments on earth the pzkw iii was at the forefront of the dramatic advances of 1941 and the defensive efforts of the following year all undertaken in the incredible vastness of the libyan desert this volume of the tankcraft series concludes the story of the tank s north african service examining the models that took part in the campaign beginning with the retreat from el alamein and ending with the surrender of the last axis forces in tunisia in may 1943 using archive photos and extensively researched color illustrations to examine the pzkw iii and the units that operated this deservedly famous armored vehicle during the final battles in north africa a key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of these historic tanks

this series has become a favorite of many modelers and enthusiasts alike it is well worth picking up if you are an enthusiast of armor or the modeling of it modelingmadness com by 1943 confronted by heavier enemy tanks in increasing numbers german field commanders were asking for a more potent tank destroyer building on the success of the sturmgeschütz program coincidentally at this time the tiger ii was well into the development stage and experiments were being undertaken with the huge 12 8cm l 55 gun originally designed as an anti aircraft weapon and the two were eventually combined as the panzerjäger tiger ausf b better known as the jagdtiger going into combat for the first time in january 1945 these massive vehicles were almost impervious to any anti tank gun in service at the time and the 12 8cm weapon could penetrate the thickest armor it was the largest armored fighting vehicle to see action during the second world war and hitler was so impressed with these gigantic tank killers that he was briefed on the progress of individual vehicles on a daily basis drawing on official documentation and unit

histories dennis oliver investigates the formations that operated these deservedly famous vehicles and uses archive photos and extensively researched color illustrations to examine the markings camouflage and technical aspects of the jagdtigers that fought in the last battles of the war a key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of these historic vehicles

by 1944 the german army was on the defensive on all fronts and allied bombing was putting increasing pressure on the nation s industrial output since the earliest days of the war the germans had experimented with mounting anti tank weapons on obsolete chassis and one of the most successful of these would prove to be the jagdpanzer 38 more often referred to today as the hetzer small and unimposing the hetzer s appearance belied its effectiveness armed with the powerful 7 5cm l 48 gun the same weapon fitted to the jadgpanzer iv the hetzer featured armour sloped armour plates of up to 60mm thickness and was capable of a top speed of 42 kilometres per hour almost 3 000 examples were assembled and its low cost and ease of production meant that it was germany s most important tank killer of the late war period in his latest book in the tankcraft series dennis oliver uses archive photos and extensively researched color illustrations to examine the hetzer tank destroyers and the units of the german army and waffen ss that operated them during the last months of the second world war a key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of these historic tanks

for much of the cold war the british army s main battle tanks mbt were first the centurion and then the chieftain the question of the latter s replacement became urgent when in 1980 mbt80 was canceled while the royal ordnance challenger originally the shir 2 was acquired as a stop gap its design and capability limitations quickly became apparent vickers then took over the royal ordnance tank building facility and against stiff foreign competition developed the challenger 2 this superbly researched and

illustrated book tells the story of the evolution and subsequent successful career of challenger 2 which has seen distinguished service in war and peace since 1990 and has proved itself one of the worlds most formidable fighting vehicles the authors do not shy away from technical detail and make comparisons with competitors the result is an objective and authoritative work which will delight military equipment buffs modelers and wargamers
