our choices our lives unapologetic writings on abortion a riveting collection of writings our choices our lives challenges those who reduce abortion to pro and anti and reveals the many faces of the abortion issue the anthology explores the people behind the political question should abortion be legal our choices our lives takes the abortion issue to a new level women s personal testimonies about their abortion experiences reveal the liberating sometimes poignant reality that can accompany the choice to end an unplanned and unwanted pregnancy women s health care workers from counselors to doctors compassionately bear witness to women s abortion experiences and provide patients with medical and educational services in an environment that can be physically and emotionally dangerous to both themselves and their patients our choices our lives concludes with the critical deconstruction of the state of abortion politics by political and religious activists and outlines the political social economic and moral imperatives behind protecting a woman s right to choose abortion

our genes our choices how genotype and gene interactions affect behavior second edition explains how the complexity of human behavior including concepts of free will derives from a relatively small number of genes which direct neurodevelopmental sequences are people free to make choices or do genes determine behavior paradoxically the answer to both questions is yes because of neurogenetic individuality a new theory with profound implications here author david

goldman uses judicial political medical and ethical examples to illustrate that this lifelong process is guided by individual genotype molecular and physiologic principles as well as by randomness and environmental exposures a combination of factors that we choose and do not choose written in an authoritative yet accessible style the book includes practical descriptions of the function of dna discusses the scientific and historical bases of genethics and introduces the topics of epigenetics and the predictive power of behavioral genetics in the decade since the first edition published knowledge of genetic influences on the neurogenetic underpinnings of behavior has been transformed by genomic technologies genome wide association studies for example have revealed that hundreds of genes influence vulnerability to psychiatric disease and innate predisposition to risk taking behaviors this new edition has been thoroughly revised to focus on free will and its neurogenetic origins in addition the use of polygenic scores for behavioral prediction are discussed in depth reflecting the gwas genome wide association study revolution and combined use of genetic predictors in polygenic scores sections on epigenetics are also substantially expanded throughout better defined and tied to neuroplasticity and gene environment interaction figures and illustrations have been added or improved throughout and disease nosology and terminology has been updated updates on the previous edition which was the first prize winner of the 2013 bma medical book award for basic and clinical sciences poses and resolves challenges to moral responsibility raised by modern genetics and neuroscience analyzes the neurogenetic origins of human behavior and free will features expanded sections on the neurogenetic basis of free will polygenic risk scores and epigenetic influence over behavior as well as improved figures and updated terminology

the philosophy of reasoning for the choices we make combines biological psychological and social factors to provide a values approach our values are the basis on our choices across the four realities it is our values that drive our conflicts and unhappiness across human societies and in our personal relationships which needs to be understood to deliver peace and happiness reasoning our choices brilliantly elucidates why the universe and the societies we inhabit is the way it is it is for everyone to learn and improve our reasoning to find greater harmony within our choices

life can be hard cold and painful or it can be pleasant warm and rewarding the consequences of the choices we make in life determine which way it will be we cant control many of lifes events but we can control how we deal with them our responsibility is to build a successful life in a world of confusion pain and disorientation in choices responsible decisions for a godly life author dr robert f kirk explains that each of us is responsible for the outcome of our life the individual choices we make in life determine what we will become kirk discusses the natural and spiritual choices that determine our success or failure and he recommends the book of proverbs as a guide for godly wisdom to assist us in those decisions the book of proverbs a powerful book that provides instruction and guidance instructs us to partner with god in our choices using his wisdom we dont have to travel the road of life alone however we must make our own choices and we need to choose wisely to be successful choices responsible decisions for a godly life will help you make a plan for wise decisions in your life

the heroes of the bible werent any more gifted or powerful than you are they were flawed ordinary people living ordinary lives and doing ordinary things their struggles and temptations were no different from ours but they allowed their ordinary lives to be interrupted by god who is anything but ordinary they chose to obey god when they did not necessarily see a happy ending and when they did what we see as a remarkable hero in the bible is just an ordinary person reflecting the glory of god our capabilities are far less influential than the choices we make and our choices become the stories of our lives we can continue to serve the pain of our past and be held captive by what we wish we could change or we can let our belief in the power of god overshadow the size of our enemy and the depth of our weakness god doesnt need heroes he wants you his power and glory are most evident in your weakness your past is never too complicated or too far gone for god to redeem into something beautiful resurrection is his specialty

in recent years numerous attempts have been made by analytic philosophers to naturalize various different domains of philosophical inquiry all of these attempts have had the common goal of rendering these areas of philosophy amenable to empirical methods with the intention of securing for them the supposedly objective status and broad intellectual appeal

currently associated with such approaches this volume brings together internationally recognised analytic philosophers including alvin plantinga peter van inwagen and robert audi to question the project of naturalism the articles investigate what it means to naturalize a domain of philosophical inquiry and look at how this applies to the various sub disciplines of philosophy including epistemology metaphysics and the philosophy of the mind the issue of whether naturalism is desirable is raised and the contributors take seriously the possibility that excellent analytic philosophy can be undertaken without naturalization controversial and thought provoking analytic philosophy without naturalism examines interesting and contentious methodological issues in analytic philosophy and explores the connections between philosophy and science

navigating the social world requires sophisticated cognitive machinery that although present quite early in crude forms undergoes significant change across the lifespan this book will be the first to report on evidence that has accumulated on an unprecedented scale showing us what capacities for social cognition are present at birth and early in life and how these capacities develop through learning in the first years of life the volume will highlight what is known about the discoveries themselves but also what these discoveries imply about the nature of early social cognition and the methods that have allowed these discoveries what is known concerning the phylogeny and ontogeny of social cognition to capture the full depth and breadth of the exciting work that is blossoming on this topic in a manner that is accessible and engaging the editors invited 70 leading researchers to develop a short report of their work that would be written for a broad audience the purpose of this format was for each piece to focus on a single core message are babies aware of what is right and wrong why do children have the same implicit intergroup preferences that adults do what does language do to the building of category knowledge and so on the unique format and accessible writing style will be appealing to graduate students and researchers in cognitive psychology developmental psychology and social psychology

with some exceptions there is not a real interest in islamic philosophy and t ology in western institutions today this largely ignored area has the potential to present enlightening insights into the development of the western thought and to

contribute to contemporary discussions in philosophy and theology in general scholars working in islamic thought usually focus on its medieval background and consider it to be mainly of a historical interest and far away from the intellectual world of today showing its contemporary relevance is an important task by which the status of islamic philosophy can be elevated to its proper station by considering these points in mind the university of kentucky organized an international graduate student conference on islamic philosophy and the ogy with an emphasis on its contemporary relevance which was held between the 28th and 30th september 2007 this book emerged out of the conf ence by adding more chapters relevant to the main theme of the book this book presents analyses and discussions of different topics in islamic philo phy and theology by relating them to contemporary debates and ideas in four main areas epistemology metaphysics philosophy of religion and value t ory there are ten chapters in sum some of the chapters are written by graduate students and some of them by experienced scholars each chapter presents c siderable insight into its relevant topic but does not represent the opinion of anybody except the author
