the importance of collective behavior in early medieval Europe by the fifth and sixth centuries the bread and circuses and triumphal processions of the Roman Empire had given way to a quieter world and yet as Shane Bobrycki argues the influence and importance of the crowd did not disappear in early medieval Europe in the crowd in the early middle ages Bobrycki shows that although demographic change may have dispersed the urban multitudes of Greco-Roman civilization collective behavior retained its social importance even when crowds were scarce most historians have seen early medieval Europe as a world without crowds in fact Bobrycki argues early medieval European sources are full of crowds although perhaps not the sort historians have trained themselves to look for harvests markets festivals religious rites and political assemblies were among the gatherings used to regulate resources and demonstrate legitimacy indeed the refusal to assemble and other forms of slantwise assembly became a weapon of the powerless Bobrycki investigates what happened when demographic realities shifted but culture religion and politics remained bound by the past the history of crowds during the five hundred years between the age of circuses and the age of crusades Bobrycki shows tells an important story one of systemic and scalar change in economic and social life and of reorganization in the world of ideas and norms

a collection of papers in English by one of the foremost historians of the social and economic structure of medieval rural communities who here examines local societies in rural northern Spain and Portugal in the early middle ages principal themes are scribal practice and the analysis of charter texts gift sale and wealth justice and judicial procedures always with a concern for personal relationships and interactions for mobility for decision making and for practice a sense of land and landscape runs throughout the Spanish and Portuguese experience has seemed irrelevant to the great debates of early medieval European history that occupy historians but Spain and Portugal shared the late Roman heritage which influenced much of western Europe in the early middle ages and by the tenth century records and practice in Christian Iberia still shared features with the Carolingian world this book offers a substantial corpus of Iberian evidence to set beside Frankish Italian English and Scandinavian material and thereby makes it possible for northern Iberia to play a part in these great debates of medieval European history cs1084

disputes and on transmission of property while the redon charters have long been known as a source of fundamental importance for breton history the author's database established in the 1980s allowed much greater understanding of the role of individuals at all social levels and particularly peasant level than had previously been possible attention to the detail of the east breton past also includes papers on some of the results of her fieldwork on building stone in particular early medieval brittany is not merely interesting in itself and it is certainly not some celtic backwater breton evidence can usefully be differentiated from the evidence of other celtic areas and has a significant role in wider issues of european history as well as papers on the familiar themes of kingship rulership cult sites and cemeteries the final section highlights the distinctive quality of the breton evidence for the protection of sacred and personal space for slavery and serfdom and for village level courts

the early middle ages the 500 years following the fall of rome was a violent time of invasion and war that saw the breakdown of society yet this period saw important social and political changes leading first to the civilization of the late middle ages and the renaissance and then to modern western culture

for seven years a collaboration between the institute for medieval studies of the austrian academy of sciences and the universities of utrecht cambridge leeds and paris i sorbonne provided the opportunity for young researchers to discuss and coordinate their work the title of the project and of this volume texts and identities provides the framework for case studies in different fields of early medieval history they include apparently disparate topics such as historiography and hagiography monastic spaces and memories lay and ecclesiastic legislation as well as liturgy and penance rather than defining a common field of research the meetings from which these papers have emerged derived their coherence from their common methodological framework this approach combines two elements on the one hand emphasis has been laid on the careful analysis of the transmission of texts and of the manuscript evidence on the other research has focused on the problem of identity or rather of processes of identification including the perception of differences between specific social political and religious communities in the combination of these two approaches the extant texts from the early medieval period are not only seen as mere reflections of ethnic social and cultural identities but also as media that gave meaning to social practices and were often intended to inspire guide change or prevent action directly or indirectly the written texts that have been transmitted to us can be seen as part of a cultural effort to shape the present by means of restructuring the past the often discordant voices of medieval authors allow modern historians to grasp something of the multiplicity of the early medieval world and of the disagreements conflicts idiosyncrasies and individual perceptions among the people who lived in that period many contributions in this volume propose specific methods for studying changing identities they analyse differences between similar texts over time or specifically changes in texts in the course of their transmission the papers collected in this

volume illustrate that texts were integral parts of a world in transformation
