the most distinguished series in military history published in the us for the first time each is volume written by a leading authority in the field and edited by john keegan the world s preeminent military historian from the rise of hitler and mussolini to the battles in normandy and north africa this comprehensive and illuminating volume explains the causes and tactics of warfare that engulfed europe during world war ii

examining the clandestine and subversive activities of algerian nationalists in west germany and europe mathilde von bulow sheds new

light on the extent to which fln activities and french counter measures impacted the conflict in algeria and the politics of the global cold war

this compelling history of europe s cold war follows the dramatic arc of the conflict that shaped the development of the continent and defined world politics in the second half of the twentieth century focusing on european actors and events mark gilbert traces the onset of the cold war the process of stalinization in the soviet bloc and the difficulties of legitimization experienced by communist regimes in hungary poland and east germany even after stalin s death he also shows how washington s leadership and worldview was contested in western europe especially by great britain and french president charles de gaulle the book charts the growing weakness of the communist system in eastern europe and the economic and moral reasons for the system s eventual collapse it highlights the central role of european leaders in the process of détente and in the diplomatic endgame that concluded the cold war in 1990 rather than simply a strategic standoff between the superpowers gilbert argues the cold war was a social and ideological conflict that transformed europe from lisbon to riga fast paced and readable this political intellectual and social history illuminates a conflict that continues to resonate today

in this highly provocative and documented book thibault muzergues describes how war in europe is now more likely than it has been for at least the past 30 years how it might come back to europe and what europeans can do to avoid getting drawn again in fratricide conflicts many consider europe a continent of peace with nato guaranteeing its security and the eu providing the political glue for a europe whole and free but what if this was not the case anymore what if after a decade of crisis today s europe was much more fragile than we thought the author challenges our assumptions about peace in europe and forces us to face the realities of a world that has become much more dangerous far from being apocalyptic this book serves as an advance warning to the dangers both internal and external that are now closing in on europe and suggests solutions to avoid them this book will be key reading for those interested in european politics and history the european union security and strategic studies and more broadly to current affairs and international relations

formed in 1947 the united nations economic commission for europe unece was the first postwar international organization dedicated to economic cooperation in europe linking the universalism of the un to european regionalism both cold war superpowers the usa and the soviet union were founding members of the unece building on the league of nations difficult heritage and in an increasingly challenging political environment the unece s mission was to facilitate european cooperation transcending the boundaries set by the cold war with a number of competitor organizations set against it the unece managed to carve out a niche for itself setting norms and standards that

still have an impact on the everyday lives of millions in Europe and beyond today working against an overwhelming geopolitical trend. Since the end of the cold war, the EU has succeeded in bridging the divide on several occasions and maintained a broad system of contacts across the iron curtain. This book provides a unique study of this important but hitherto under-researched international organization, incorporating research on the cold war, the history of internationalism and European integration. Stinsky weaves these different threads of historical enquiry into a single analytical narrative.

Excerpt from *The War in Europe*: its causes and results. No excuse will be offered for the smallness of this book in comparison with the vastness of its subject. The author has felt a personal need of some knowledge of those conditions of Europe which bear upon the origin of the great war of 1914. Thence it was a short road to the thought that other Americans might be interested in a brief but systematic statement of the resources, aims and difficulties of the European powers, the manner in which they became involved in the war and the probable results of the struggle to America and to the rest of the world. The book is based first of all on personal acquaintance, either through travel or residence with all the great and small countries at war or threatened with war, except Russia and the Scandinavian countries. Much in these pages results from studies begun thirty years ago in the universities of Freiburg and Berlin and the *École des Sciences Politiques* in Paris. Additional data have been collected expressly for this volume. About the publisher: Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at forgottenbooks.com. In 1941 the European war became a world war. This book tackles that process in its economic, political and ideological dimensions. Margaret Lamb and Nicholas Tarling explore the significance of the Asian factor and the importance of East Asia in the making of the war in Europe and the transformation of the European war of 1939 into the world war of 1941. This Asian factor has often been neglected but the policies of all the major powers were affected by their world-wide interests. France had its possessions in North Africa and Asia. Nazi Germany chose to become involved in China and to make an agreement with Japan. Britain's action in Europe and the Mediterranean were conditioned by its commitments elsewhere in the world and the United States and the Soviet Union were both involved in Europe and Asia. In particular, the threat that Japan presented to the status quo in East Asia made it difficult for the war in Europe in turn affected the position in East Asia. The US built a two-ocean navy and encouraged the British to continue their struggle by keeping the resources of South East Asia available and these steps led to a clash with the Japanese. Lamb and Tarling's global approach throws valuable new light

on the origins of the second world war

in the late 1930s a number of american women especially those allied with various peace and isolationist groups protested against the nation's entry into world war ii while their story is fairly well known margaret paton walsh reveals a far less familiar story of women who fervently felt that american intervention was absolutely necessary paton walsh recounts how the united states became involved in the war but does so through the eyes of american women who faced it as a necessary evil covering the period between 1935 and 1941 she examines how these women functioned as political actors even though they were excluded from positions of power through activism in women's organizations informal women's networks and even male dominated lobbying groups in the great debate over whether america should enter the war some women favored aid to the allies not because they hoped for war but because they hoped aid would forestall more direct u.s. involvement but also because they believed war was preferable to a nazi victory paton walsh shows that this activism involved some of the most prominent women of their day elizabeth cutter morrow whose son in law charles lindbergh was an isolationist spokesman supported the revision of the neutrality acts to allow the sale of arms to the allies and expressed her support in a national radio broadcast soon other women joined this debate esther brunauer of the aaup journalist dorothy thompson and organizations like the league of women voters and national women's trade union league broke from the pacifist tradition to advocate american aid for the allied cause focusing on the conflict in europe paton walsh shows how these women grasped the implications of the lend lease program for america's entry into the war but supported it nevertheless by late 1941 the women's division of the fight for freedom committee had been established no longer merely advocating aid to britain to keep american boys out of battle this organization supported direct american involvement in the war as a means of stopping nazi oppression while most historians have focused on women's pacifism paton walsh connects women more directly to world events and shows how those interventionists reformulated maternalist ideas to justify and explain their beliefs our war too is a story of american women trying to reconcile the irreconcilable to preserve both their principles and their peace it expands our understanding of women as political actors and thinkers about foreign policy as it sheds new light on american public opinion over the build up to the war

the conventional narrative of the second world war is well known after six years of brutal fighting on land sea and in the air the allied powers prevailed and the nazi regime was defeated but as in so many things the truth is somewhat different bringing a fresh eye to bear on a story we think we know norman davies forces us to look again at those six years and to discard the usual narrative of allied good versus nazi evil reminding us that the war in europe was dominated by two evil monsters hitler and stalin whose fight for supremacy consumed the best people in germany and in the ussr the outcome of the war was at best ambiguous the victory of the west was only partial its moral reputation severely tarnished and for the greater part of the continent of europe liberation was only the

beginning of more than fifty years of totalitarian oppression davies writes with real knowledge and passion michael burleigh evening standard punchy and compelling noel malcolm sunday telegraph

excerpt from the war in europe and its lessons for us an address while i have found receptive audiences all over the country there is no community in which i would expect a more sympathetic hearing than in this because the distinguished gentle man who represents you in congress views the subject from the same standpoint that i do whenever a new question arises upon which the people have not expressed themselves it is important that each individual should make known his views in order that public opinion may represent the voters generally and not a portion of the people only the country would be fortunate if all of our public men were as candid and as courageous in taking a position as congressman bailey who honors you as he is honored by you in order that you may follow me the more easily i shall outline in advance the address which i am to deliver to you it naturally divides itself into three parts first the war as it is and its injury to neutrals second the false philosophy out of which the war has grown and the natural results of that false philosophy and third the way out or the road to permanent peace the subject is presented with a view to emphasizing the lessons which this country can draw from the conflict beyond the ocean about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

following the 2022 energy crisis this paper investigates whether europe's ongoing efforts to cut greenhouse gas emissions can also enhance its energy security the global computational general equilibrium model analysis finds that individual policy tools including carbon pricing energy efficiency standards and accelerated permitting procedures for renewables tend to improve energy security compared to carbon pricing sector specific regulations deliver larger energy security gains and spread those more evenly across countries benefitting also some fossil fuel intensive economies in central and eastern europe this finding strengthens the case for a broad climate policy package which can both achieve europe's emissions reduction goals and deliver sizeable energy security co benefits an illustrative package which would cut emissions in the eu uk and efta by 55 percent with respect to 1990 levels by 2030 is estimated to improve the two energy security metrics used in this paper by close to 8 percent already by 2030 beyond the policies analyzed in the model the paper also discusses the technology market design and supply chain reforms that europe needs for an energy secure green transition
