this first book length study of girls primary education in france gives a concrete picture of how frenchwomen were and are prepared for their roles in society until the 1960s the primary school provided the only formal education for the majority of french children long recognized as a major inculcator of patriotic and moral values the french primary school also played the vital role of preparing girls for their expected adult lives linda l clark describes in detail this socialization process by analyzing a wide variety of documents from 1870 to the present textbooks curriculum materials students notebooks examination questions inspectors reports and teachers memoirs she has uncovered not only what was taught to girls but the

social and political assumptions that lay behind the primary school's messages about feminine personalities and activities the book goes on to establish the relationship of feminine images to important aspects of French social economic and political life a chapter on the preparation of girls for the world of work for example reveals the discrepancy between formal teaching about femininity and women's actual participation in society

there have been numerous studies in recent decades of the medieval inquisitions most emphasizing larger social and political circumstances and neglecting the role of the inquisitors themselves in this volume karen sullivan sheds much needed light on these individuals and reveals that they had choices both the choice of whether to play a part in the orthodox repression of heresy and more frequently the choice of whether to approach heretics with zeal or with charity in successive chapters on key figures in the middle ages bernard of clairvaux dominic guzmán conrad of marburg peter of verona bernard gui bernard délicieux and nicholas eymerich sullivan shows that it is possible to discern each inquisitor making personal moral choices as to what course of action he would take all medieval clerics recognized that the church should first attempt to correct heretics through repeated admonitions and that if these admonitions failed it should then move toward excluding them from society yet more charitable clerics preferred to wait for conversion while zealous clerics preferred not to delay too long before sending heretics to the stake by considering not the external prosecution of heretics during the middle ages but the internal motivations of the preachers and inquisitors who pursued them as represented in their writings and in those of their peers the inner lives of medieval inquisitors explores how it is that the most idealistic of purposes can lead to the justification of such dark ends
