this book should be read by anyone commissioning impact assessments who wants to build their understanding of the more progressive and innovative end of the topic a job well done in the eyes of stakeholders and regulators requires proper social analysis jon samuel head of social performance anglo american the list of authors reads like a who s who in sia academics and practitioners are equally represented among the authors the book provides a good mix of broad theoretical concepts and specific practical topics martin haefele manager environmental impact assessment at mackenzie valley environmental impact review board yellowknife northwest territories canada this book gives a very broad overview of where social impact assessment is coming from where it is now and where it could go from an impact assessment tool to an impact management tool it provides a realistic insight in both the achievements and the struggles of social impact assessment a recommended read for both those interested in social impact assessment and

those in related domains where social issues are gaining increasing importance such as environmental assessment and sustainability appraisal. Rob Verheem, deputy director, Netherlands Commission for Environmental Assessment. This important new book outlines current developments in thinking in the field of social impact assessment. It advances the theory and practice of SIA and argues that a dramatic shift is required in the way socioeconomic studies and community participation is undertaken. The book emphasizes that much more than the act of predicting impacts in a regulatory context, SIA needs to be the process of managing the social aspects of development and that there needs to be a holistic and integrated approach to impact assessment. It stresses that greater attention needs to be given to ensuring that the goals of development are attained and enhanced. This significant addition to the literature will be an invaluable reference for academics, consultants and practitioners.

Research in science education has recognized the importance of history and philosophy of science (HPS). The nature of science (NOS) is considered to be an essential part of HPS with important implications for teaching science. The role played by textbooks in developing students' informed conceptions of NOS has been a source of considerable interest for science educators in some parts of the world. Textbooks become the curriculum and determine to a great extent what is taught and learned in the classroom. Given this background and interest, this monograph has evaluated NOS in university-level general chemistry textbooks published in the U.S. Most textbooks in this study provided little insight with respect to the nine criteria used for evaluating NOS. Some of the textbooks, however, inevitably refer to HPS and thus provide guidelines for future textbooks. A few of the textbooks go into considerable detail to present the atomic models of Dalton, Thomson, Rutherford, Bohr, and wave mechanical to illustrate the tentative nature of scientific theories. An important NOS aspect: these results lead to the question, are we teaching science as practiced by scientists? An answer to this question can help us to understand the importance of NOS by providing students an HPS-based environment so that they too, just like the scientists, feel the thrill and excitement of discovering new things. This monograph provides students and teachers guidelines for introducing various aspects of NOS based on historical episodes.

Gaining an understanding of the recreation and parks profession is crucial to success in the field and to effective leadership within the field. Recreation and parks: the profession is a one of a kind resource that delineates the components that make this complex field a profession. Written by well-known recreation authority Betty van der Smitten, this book defines the marks of the recreation and parks profession and identifies the steps involved in becoming a professional in the field. Profiles of 62 professional organizations within the profession provide a site that features a time line of the development of areas and organizations of the profession and the most up-to-date addresses for organizations detailed in the text. Outlines a comparative history of 15 categories of the recreation and parks field in the United States and Canada and presents a classic to contemporary bibliography of resources that showcases an inclusive body of knowledge on the profession. Part I describes recreation and parks as a profession and provides students with steps to lay a solid foundation to become a professional. Part II grounds readers with a comparative historical overview of the recreation and parks field from the 1500s to the present day. The author divides the field into 15 categories and offers suggestions on how to use the time line. Part III profiles 62 professional organizations. Each profile includes the organization's mission, goals, structure, history, publications,

services and professional credentialing information in addition it lists the organization's sites contact information and other vital information that students use in completing course work in applying for internships and in researching various aspects of the profession part iv contains a bibliography of selected resources on recreation and parks from classic to the present recreation and parks the profession includes a site that not only provides links to other current sites for the organizations profiled but it also is linked to a color coded version of the time line the time line is ready to download print and use in the classroom or office this version of the time line provides the most effective way to obtain an overall picture of the historical comparison of the categories in the recreation and parks profession recreation and parks the profession is a unique resource for students professors and professionals in recreation and parks the text brings together the important aspects of the field as a profession
