this book shows that the security economic political and social problems challenging national security democracy and good governance currently in nigeria would get better or worse depending on what happens to the 71 percent of nigerias population still living below the poverty line this is in spite of the billions of petrodollars that nigeria garnered as revenue over the past few decades it reveals that one does not need to be a political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth this country will witness worse civil disobedience violence revolts militancy breakdown of law and order more kidnappings and more of the citizens trying to check out of the country to other parts of the world in the future it concludes however that under such intense pressures the government of nigeria even if it is simply for its self preservation will be forced by the objective conditions to move against the interests of the dominant groups and classes in nigeria these are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use there is this perception that nigerians dont write and read this perception is deep seated
