digital totalitarianism algorithms and society focuses on important challenges to democratic values posed by our computational regimes policing the freedom of inquiry risks to the personal autonomy of thought neoliberal management of human creativity and the collapse of critical thinking with the social media fueled rise of conspiranoia digital networks allow for a granularity and pervasiveness of surveillance by government and corporate entities this creates power asymmetries where each citizen s daily data exhaust can be used for manipulative and controlling ends by powerful institutional actors this volume explores key erosions in our fundamental human values associated with free societies by covering government surveillance of library based activities cognitive enhancement debates the increasing business orientation of art schools and the proliferation of conspiracy theories in network media scholars and students from many backgrounds as well as policy makers journalists and the general reading public will find a multidisciplinary approach to questions of totalitarian tendencies encompassing research from communication rhetoric library sciences art and new media

the dangers of technological totalitarianism and surveillance capitalism inside the algorithm is a book that explores the dangers and challenges facing contemporary society in a world increasingly dominated by technology and characterized by massive data collection in this book the author addresses two distinct but interconnected dangers arising from the

same technological tools the first danger is the resurgence of extreme totalitarian regimes in which technological tools are used to monitor and control the population in ways previously unimaginable the author points out that these abuses can occur in various countries and warns of the potential for totalitarianism to become the norm in some nations the second danger addressed is surveillance capitalism an economic and social system based on the collection and exploitation of personal data the author examines in detail the cycle of surveillance capitalism from massive data collection to monetization highlighting the risks of privacy manipulation and social compliance that arise in this context the book also explores the social and ethical consequences of surveillance capitalism raising questions about corporate and government responsibility for controlling and transparently the algorithms that shape our lives throughout the chapters the author presents case studies and concrete examples to illustrate the dangers and impacts of these phenomena in addition strategies of resistance and preservation of privacy are discussed aimed at providing readers with a broader understanding of the meaning of human life in a world where increasingly important decisions are made by external algorithms the dangers of technological totalitarianism and surveillance capitalism is essential work for those seeking to understand the challenges and dilemmas of today s technological world the book serves as a warning about the importance of reflecting on the importance of freedom privacy and human action in an age dominated by algorithms and surveillance systems

this new collection of essays follows in the footsteps of the successful volume thinking ahead essays on big data digital revolution and participatory market society published at a time when our societies were on a path to technological totalitarianism as exemplified by mass surveillance reported by edward snowden and others meanwhile the threats have diversified and tech companies have gathered enough data to create detailed profiles about almost everyone living in the modern world profiles that can predict our behavior better than our friends families or even partners this is not only used to manipulate peoples opinions and voting behaviors but more generally to influence consumer behavior at all levels it is becoming increasingly clear that we are rapidly heading towards a cybernetic society in which algorithms and social bots aim to control both the societal dynamics and individual behaviors span lang en us style font family however there are also silver linings most of the threats that have accumulated over the past years have been identified and

regulations are on the way to being introduced furthermore entirely novel approaches based on blockchain technology and other developments derived from complexity science offer the possibility of entirely redefining collective trust and building platforms to support our core societal values span lang en us style font family this book conveys an encouraging vision of the future and provides a sketch of how it may look the road to digital enlightenment is still open but it needs to be taken now pbrp
