Wells American Historical Association Edward L Farmer George Herbert Perris Charles Harold King*

chronologically discusses the events of history beginning with the evolution of man and ending with the restructuring of western europe in 1993

the second world war is the nightmare that sits at the heart of the modern era a total refutation of any notion of human progress and a conflict which still haunts us seventy years on norman stone s gripping new book aims to tell the narrative of the war in as brief

a compass as possible making a sometimes familiar story utterly fresh and arresting as with his highly acclaimed world war one a short history there is a compelling sense of a terrible story unfolding of a sceptical and humorous intelligence at work and a wish to convey to an audience who may well have no memory of the conflict just how high the stakes were the narrative focuses both on the key moments in the war and on the wider reasons for its taking the horrible course that it did on the hopes and delusions of the leaders who were faced with decisions which destroyed the lives of many millions of people and on the great military clashes that decided the conflict this is a beautifully written clever and imaginative attempt to convey what can almost not be conveyed

this book has been considered by academicians and scholars of great significance and value to literature this forms a part of the knowledge base for future generations so that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published hence any marks or annotations seen are left intentionally to preserve its true nature

offers a useful reminder of the role of modern science in fundamentally transforming all of our lives president barack obama on twitter an important book steven pinker the new york times book review the surprising and important story of how humans gained what amounts to an extra life from the bestselling author of how we got to now and where good ideas come from in 1920 at the end of the last major pandemic global life expectancy was just over forty years today in many parts of the world human beings can expect to live more than eighty years as a species we have doubled our life expectancy in just one century there are few measures of human progress more astonishing than this increased longevity extra life is steven johnson s attempt to understand where that progress came from telling the epic story of one of humanity s greatest achievements how many of those extra years came from vaccines or the decrease in famines or seatbelts what are the forces that now keep us alive longer behind each breakthrough lies an inspiring story of cooperative innovation of brilliant thinkers bolstered by strong systems of public support and collaborative networks and of dedicated activists fighting for meaningful reform but for all its focus on positive change this book is also a reminder that meaningful gaps in life expectancy still exist and that new threats loom on the horizon as the covid 19 pandemic has made clear how do we avoid decreases in life expectancy as our public health systems face unprecedented challenges what current technologies or interventions that could reduce

the impact of future crises are we somehow ignoring a study in how meaningful change happens in society extra life celebrates the enduring power of common goals and public resources and the heroes of public health and medicine too often ignored in popular accounts of our history this is the sweeping story of a revolution with immense public and personal consequences the doubling of the human life span

a short history of the world is an account of human history by english author h g wells it was first published in 1922 by cassell company london and the macmillan company new york the book was preceded by wells s fuller 1919 work the outline of history and was intended to meet the needs of the busy general reader too driven to study the maps and time charts of that outline in detail who wishes to refresh and repair his faded or fragmentary conceptions of the great adventure of mankind the first edition had around 400 pages with about 200 illustrations including 21 maps later editions were published with updated accounts of world events it was published in penguin books in 1936 and republished under penguin classics in 2006 the book summarises the scientific knowledge of the time regarding the history of earth and life it starts with its origins goes on to explain the development of the earth and life on earth reaching primitive thought and the development of humankind from the cradle of civilisation the book ends with the outcome of the first world war the russian famine of 1921 and the league of nations in 1922 in 1934 albert einstein recommended the book for the study of history as a means of interpreting progress in civilization

some programs include also the programs of societies meeting concurrently with the association

a comparative history of civilizations in asia from prehistoric times to the middle of the 19th century
