browse an online sample copy of the atlas read an interview with author michael farmer download sample map 30 download sample map 78 the atlas shows for the first time the contemporary geography of the entire tibetan plateau an area where major powers china india and pakistan meet in the highest landscape on earth originally inhabited by the unique ancient buddhist civilization of tibet using extensive satellite imagery the author has accurately positioned over two thousand religious locations more than a third of which appear not to have not been previously recorded nearly two thousand settlements have also been accurately located and all locations are named in both tibetan and chinese where possible this ancient landscape is shown in contrast to the massive physical infrastructure which has been recently imposed on it as an attempt to open up the west and carry forward the chinese belt and road initiative with 120 maps in full colour

geological formation names of china 1866 2000 is the only catalogue on stratigraphic nomenclature for china in the world to keep two writing types wade giles romanization and chinese phonetic alphabet so as to provide convenience for domestic and overseas readers the catalogue is intended for specialists and graduates in geosciences and stratigraphy shouxin zhang 1927 2006 was stratigrapher and research professor at the institute of geology and geophysics chinese academy of sciences

this book explores the concept of geo architecture by analyzing the ways architectures are related to the local geography including mingling or contrasting with surrounding landscape adapting to mountainous or aquatic terrain and selection of construction materials architectures build with such skillfully contrived strategies and techniques have become live exhibit of folk customs and served to record in profound detail the long history of mankind s recognition of nature the combined effect is such that the architecture grows out of the surrounding natural and human environment this book is the third of a 4 volume book series the series develops the innovative concept of geo architecture by exploring the myriad influences of natural human and historical factors upon architecture these influences are considered in three categories namely interaction between architecture and nature interaction between architecture and its human users and change in architecture over time each category serves as a lens augmenting these lenses is the time person place concept applied different geographic the analysis ultimately focuses on two aspects geographic influence on architecture and architectural response to geography the over 1000 pictures of case architectures enriches the study with stunning and unique visual angles this unprecedented work will be a unique and valuable contribution to the literature integrating as it does the disciplines of architecture landscape architecture and geography wang fang s voice is original compelling and will be much appreciated by english speaking readers and inside china too i can only imagine stephen m ervin assistant dean graduate school of design harvard university july 2nd 2013 one reason for why there would be interest is because her research would fill some significant gaps in the literature what is novel about dr wang s series is that she further extends this intellectual project of looking at chinese architecture through chinese eyes by taking it one
