arde 2003 examines the effectiveness of bank support for developing country policy reform it finds that bank support has contributed to reform in a number of cases but there are also cases where the bank s support has not been associated with improvements in the policy environment

the annual review of development effectiveness 2009 presents evidence on the world bank s efforts in two areas part i tracks the outcomes of bank projects

and country programs and the evolution of monitoring and evaluation m and e part ii examines the bank s support for environmentally sustainable development compatible with economic growth and poverty reduction the bank s project performance rebounded in 2008 allaying concerns about the weakened performance in 2007 as previous ardes have shown project performance has been improving gradually for 15 years according to the traditional measure percent of projects with satisfactory versus unsatisfactory outcomes but ieg ratings of m and e quality for completed projects indicate considerable room for progress information to assess impacts continues to be lacking although preliminary data suggests improvements in baseline data collection bank support for the environment has recovered since 2002 due to new sources of concessional finance the outcomes of environment projects have improved in recent years a growing number of regional projects are addressing the shared use of water resources new global partnerships are deepening the bank s involvement in climate change issues but m and e remains weak three quarters of environment related projects those managed by sectors other than environment lack reporting of environmental outcomes

this annual review of development effectiveness arde builds on previous reviews i e the 1998 review released in a hostile environment of financial crisis concluded that improvements in project performance cannot be enough that improvements at a higher plane of program and country performance should also be present and the 1999 review inscribed within the comprehensive development framework dilemmas and challenges identified practices for dealing with those challenges namely to be based on country commitments to poverty reduction and sustainable growth the arde 2000 finds that progress was solid on a broad front but that further progress is likely portfolio performance is likely to exceed the strategic compact target of seventy five percent satisfactory outcomes and sustainability and institutional development ratings reflect improvements though progress is commendable this review examines four tensions the bank faces learning to reconcile client and corporate priorities adapting global prescriptions to local conditions balancing country performance and poverty incidence in allocating its resources and achieving efficiency selectivity seeking to implement a holistic vision of development bank strategies should acknowledge client needs judicious adaptation to institutional social and political fronts should be pursued and an approach to poor performing countries should be addressed

the report assesses the world bank group s support for growth and productivity in the agriculture sector enhancing agricultural growth and productivity is essential to meeting the worldwide demand for food and to reducing poverty particularly in the poorest developing countries between 1998 and 2008 the period covered by this evaluation the world bank group wbg provided 23 7 billion in financing for agriculture and agribusiness in 108 countries roughly 8 percent of total wbg financing spanning areas from irrigation and marketing to research and extension however this was a time of declining focus on agricultural growth and productivity by both countries and donors the cost of inadequate attention to agriculture especially in agriculture based economies came into focus with the food crisis of 2007 08 the crisis added momentum to an emerging renewal of attention and stepped up financing to agriculture and agribusiness at the world bank and international finance corporation ifc as well as at several multilateral and bilateral agencies world bank financing rose two and a half times from 2008 to 2009 though that increase in lending seems to have been accompanied by a decline in analytical work which this review finds valuable for results this evaluation seeks to provide lessons from successes and failures to help improve the development impact of the renewed attention to the sector ratings against the world bank s stated objectives and ifc s market based benchmarks for agriculture and agribusiness projects have been equal to or above portfolio averages in east asia latin america and the transition economies in europe with notable successes over a long period in china and india but performance of wbg interventions has been well below average in sub saharan africa where ifc has had little engagement in agribusiness inconsistent client commitment and weak capacity have limited the effectiveness of wbg support in agriculture based economies particularly in sub saharan africa and constraints

on staffing and internal coordination within the wbg have also hurt outcomes financial sustainability has been constrained by insufficient government funding and the difficulty of maintaining agricultural services and infrastructure the wbg has a unique opportunity to match the increases in the financing for agriculture with sharper focus on improving agricultural growth and productivity in agriculture based economies notably in sub saharan africa greater effort will be needed to connect sectoral interventions and achieve synergies from public and private sector interventions to build capacity and knowledge exchange to take stock of experience in rain fed agriculture to ensure attention to financial sustainability and to cross cutting issues of gender environmental and social impacts and climate and to better integrate wbg support at the global and regional levels with that at the country level

the annual review of development effectiveness 2009 presents evidence on the world bank s efforts in two areas part i tracks the outcomes of bank projects and country programs and the evolution of monitoring and evaluation m e part ii examines the bank s support for environmentally sustainable development compatible with economic growth and poverty reduction the bank s project performance rebounded in 2008 allaying concerns about the weakened performance in 2007 as previous ardes have shown project performance has been improving gradually for 15 years according to the traditional measure percent of projects with satisfactory versus unsatisfactory outcomes but ieg ratings of m e quality for completed projects indicate considerable room for progress information to assess impacts continues to be lacking although preliminary data suggests improvements in baseline data collection bank support for the environment has recovered since 2002 due to new sources of concessional finance the outcomes of environment projects have improved in recent years a growing number of regional projects are addressing the shared use of water resources new global partnerships are deepening the bank s involvement in climate change issues but m e remains weak three quarters of environment related projects those managed by sectors other than environment lack reporting of environmental outcomes

a concise survey and analysis of presidential attempts over the last thirty years by democrats and republicans alike to dismantle the regulatory state that first appeared under fdr argues that the war against regulation failed and that its excesses remind us of the value and proper role of regulation in american government

cooper defines the different forms these powers take executive orders presidential memoranda proclamations national security directives and signing statements demonstrates their uses critiques their strengths and dangers and shows how they have changed over time here are washington s neutrality proclamation lincoln s emancipation proclamation and the more than 1 700 executive orders issued by woodrow wilson in world war i fdr issued many executive orders to implement his national industrial recovery act but also issued one that led to the incarceration of japanese americans during world war ii truman issued orders to desegregate the military and compel loyalty oaths for federal employees eisenhower issued numerous national security directives jfk launched the peace corps and issued an order to control racial violence in alabama all through executive action

this report addresses the conceptual basis design and implementation of the national environmental performance track program the voluntary program sought to encourage facilities to improve their environmental performance and provide a more collaborative relationship between facilities and regulators while the program had mixed success epa should continue to seek out new approaches to complement and enhance traditional regulatory approaches
