asian americans are a small percentage of the u.s. population but their numbers are steadily rising from less than a million in 1960 to more than 15 million today they are also a remarkably diverse population representing several ethnicities religions and languages and they enjoy higher levels of education and income than any other u.s. racial group historically socioeconomic status has been a reliable predictor of political behavior so why has this fast growing american population which is doing so well economically been so little engaged in the u.s. political system asian american political participation is the most comprehensive study to date of asian american political behavior including such key measures as voting political donations community organizing and political protests the book examines why some groups participate while others do not why certain civic activities are deemed preferable to others and why asian socioeconomic advantage has so far not led to increased political clout asian american political participation is based on data from the authors groundbreaking 2008 national asian american survey of more than 5,000 chinese indian vietnamese korean filipino and japanese americans the book shows that the motivations for and impediments to political participation are as diverse as the asian american population for example native born asians have higher rates of political participation than their immigrant counterparts particularly recent adult arrivals who were socialized outside of the united states protest activity is the exception which tends to be higher among immigrants who maintain connections abroad and who engaged in such activity in their country of origin surprisingly factors such as living in a new immigrant destination or in a city with an asian american elected official do not seem to motivate political behavior neither does ethnic group solidarity instead hate crimes and racial victimization are the factors that most motivate asian americans to participate politically involvement in non political activities such as civic and religious groups also bolsters political participation even among asian groups socioeconomic advantage does not necessarily translate into high levels of political participation chinese americans for example have significantly higher levels of educational attainment than japanese americans but japanese americans are far more likely to vote and make political contributions and vietnamese americans with the lowest levels of education and income vote and engage in protest politics more than any other group lawmakers tend to favor the interests of groups who

actively engage the political system and groups who do not participate at high levels are likely to suffer political consequences in the future asian american political participation demonstrates that understanding asian political behavior today can have significant repercussions for asian american political influence tomorrow

although african slavery in the united states is generally associated with the south the institution also existed in northern states as late as the 1840s especially in large urban centers such as philadelphia and new york contrariwise freed african americans in the region established rural communities all their own and actively resisted the institution as a whole the newest volume proposed for inclusion in the american experience in archaeological perspective series written by one of the leading scholars in the field of african diaspora archaeology is a synthetic analysis of recently published work on the subject although no monograph exists on northern slavery this volume provides a new perspective on the intricate connection between slavery and freedom in the united states as delle argues scholars cannot understand slavery in the absence of freedom
