summaries of clinical practice guidelines for acute pain management in adults and children

in the united states about 50 million people suffer from recurrent or chronic pain and nearly 10 of adults take medication for pain daily further the disease burden of pain is expected to grow relative to other illnesses and conditions despite the advances in pain medicine most physicians are not equately trained to treat chronic or even acute pain as in other fields of medicine pain medicine has long been dominated by expert opinion relying on personal expertise and only recently has a systematic evaluation of treatments in the terms of evidence based medicine been performed and also as in other fields of medicine a lot can be achieved in pain medicine when certain basic diagnostic and therapeutic pathways are f

lowed correctly more than can be achieved when only a few specialists are able to treat these conditions standard operating procedures sops are supposed to be concise practical aids for clinicians standardizing treatments diagnostic pathways and procedures in one of sometimes many possible ways although based on the available evidence they are not evidence based guidelines and are not supposed to replace such guidelines on one hand evidence based medicine often leaves many options open since in many cases the available evidence is not sufficient to recommend a specific option on the other hand there might be reasons due to clinical practice e.g.

learn best practices and evidence based guidelines for assessing and managing pain assessment and multimodal management of pain an integrative approach describes how to provide effective management of pain through the use of multiple medications and techniques including both pharmacologic and non pharmacologic treatment regimens a holistic approach provides an in depth understanding of pain and includes practical assessment tools along with coverage of opioid and non opioid analgesics interventional and herbal approaches to pain and much more written by experts maureen f cooney and ann quinlan colwell this reference is a complete step by step guide to contemporary pain assessment and management evidence based practical guidance helps students learn to plan and implement pain management and aligns with current guidelines and best practices comprehensive information on the pharmacologic management of pain includes nonopioid analgesics opioid analgesics and co analgesics including dose titration routes of administration and prevention of side effects unique multimodal approach for pain management is explored throughout the book as it affects assessment the physiologic experience and the culturally determined expression acknowledgement and management of pain unique holistic integrative approach includes thorough coverage of pain management with non pharmacologic methods clinical scenarios are cited to illustrate key points equivalent analgesic action for common pain medications provides readers with useful guidance relating to medication selection pain rating scales in over 20 languages are included in the appendix for improved patient clinician communication and accurate pain assessment unique authors maureen f cooney and ann quinlan colwell are two of the foremost authorities in multimodal pain assessment and management sample forms guidelines protocols and other hands on tools are included and may be reproduced for use in the classroom or clinical setting
