this book offers the first in depth analysis of the relationship between art and design which led to the creation of pop challenging accepted boundaries and definitions the authors seek out various commonalities and points of connection between these two exciting areas confronting the all pervasive high art low culture divide pop art and design brings a fresh understanding of visual culture during the vibrant 1950s and 60s this was an era when commercial art became graphic design illustration was superseded by photography and high fashion became street fashion all against the backdrop of a rapidly evolving economic and political landscape a glamorous youth scene and an effervescent popular culture the book s central argument is that pop art relied on and drew inspiration from pop design and vice versa massey and seago assert that this relationship was articulated through the artwork design publications and exhibitions of a network of key practitioners pop art and design provides a case study in the broader inter relationship between art and design and constitutes the first interdisciplinary publication on the subject

this book is ambitiously inter disciplinary and may be divided into four main sections defined in terms of the authors themselves firstly there are two contributions by biologists secondly the largest section is by practising artists thirdly there are two engineering based contributions finally two contributions address some of the historical proponents of colour theory and art these eleven works in full colour form a striking contribution to the commonwealth of colour studies and to a possible unification of snow s two cultures colour and inter disciplinarity go hand in hand this so often involves the authors leaving the comfort zone of their original speciality and striving for excellence in another the personal story of franziska schenk is but one good example it seems that our

responding to many recent calls for redress and restitution richardson summarises the historical and current situation and attributes its problematics to the fact that theorists and historians have taken the concept art as a generic that includes both design and craft which are actually and validly distinguishable from art by application of the concept function al or else ignored the two entirely considering the concept function al he maintains calls into question the view that the three may be sub classes of the one class whereas in a work of art typically there is a resolution of the tension between form and content in works of design and craft the resolution is between form and function how this recognition can clarify the issue informs the entire book the book s other major thesis is the realisation that aesthetic values are inherently human and that therefore they apply not only to art but to life in general far from being frivolous or a mere emotion the aesthetic is a sense of equivalent psychic status to sight and hearing and like them is employed at almost every moment of our daily lives which fact grounds art design and craft deeply in human life this is reflected in the universal use of the human form including the exhibition of sexual characteristics in art the eternal conflict between making art and making a living from making art is examined and contrasted to the rarely recognised but positive role of design in planning and industry richardson also critiques common theories of representation and composition including creativity albertian perspective and scientific and geometric theories of beauty and composition also the relevance of the camera and the computer in the field
