this book explores the new politics of class in 21st century Britain. It shows how the changing shape of the class structure since 1945 has led political parties to change, which has both reduced class voting and increased class non-voting. This argument is developed in three stages. The first is to show that there has been enormous social continuity in class divisions; the authors demonstrate this using extensive evidence on class and educational inequality, perceptions of inequality, identity and awareness, and political attitudes over more than fifty years. The second stage is to show that there has been enormous political change in response to changing class sizes, party policies, politicians' rhetoric, and the social composition of political elites. These changes have radically altered parties: policies that once appealed to specific classes are now less specific, and parties are populated by people from more similar backgrounds. Simultaneously, the mass media have stopped talking about the politics of class. The third stage is to show that these political changes have had three major consequences: first, as Labour and the Conservatives became more similar, class differences in party preferences disappeared; second, new parties, most notably UKIP, have taken working class voters from the mainstream parties; third, and most importantly, the lack of choice offered by the mainstream parties has led to a huge increase in class-based abstention from voting. Working class people have become much less likely to vote. In that sense, Britain appears to have followed the US down a path of working class political exclusion, ultimately undermining the representativeness of our democracy. The book concludes with a discussion of the Brexit referendum and the role that working class alienation played in its historic outcome.

This volume delves into the study of the world's emerging middle class with essays on Europe, the United States, Africa, Latin America, and Asia. The book studies recent trends and developments in middle class evolution at the global, regional, national, and local levels. It reconsiders the conceptualization of the middle class with a focus on the diversity of middle class formation in different regions and zones of world society. It also explores middle class lifestyles and everyday experiences, including experiences of social mobility, feelings of insecurity and anxiety, and even middle class engagement with social activism. Drawing on extensive fieldwork and in-depth interviews, the book provides a sophisticated analysis of this new and rapidly expanding socioeconomic group and puts forth some provocative ideas for intellectual and policy debates. It will be of importance to students and researchers of sociology, economics, development studies, political studies, Latin American studies, and Asian studies.
