from biology to economics to information theory the theme of interdependence is in the air framing our experiences of all sorts of everyday phenomena indeed the network may be the ascendant metaphor of our time yet precisely because the language of interdependence has become so commonplace as to be almost banal we miss some of its most surprising and far reaching implications in interdependence biologist kriti sharma offers a compelling alternative to the popular view that interdependence simply means independent things interacting sharma systematically shows how interdependence entails the mutual constitution of one thing by another how all things come into being only in a system of dependence on others in a step by step account filled with vivid examples sharma shows how a coherent view of interdependence can help make sense not only of a range of everyday experiences but also of the most basic functions of living cells with particular attention to the fundamental biological problem of how cells pick up signals from their surroundings sharma shows that only an account which replaces the perspective of individual cells interacting with external environments with one centered in interdependent recursive systems can adequately account for how life works this book will be of interest to biologists and philosophers to theorists of science of systems and of cybernetics and to anyone curious about how life works clear concise and insightful interdependence biology and beyond explicitly offers a coherent and practical philosophy of interdependence and will help shape what interdependence comes to mean in the twenty first century

writers urge the church to help identify the essentials of christian perspective on the societal environmental and economic implications of globalization and to live accordingly

are you a hoco i think you are a hoco is not a dirty word it s short for homo competens and that is not an insult that s latin for competent person if you are a hoco or want to be one this book is for you this book talks about competent people in the network age it discusses competence the times we live in and presents guidelines and tools that you the homo competens will need to thrive in your personal life at work and in society at large if we really mean that competent people

are our most important asset let's not treat competence as a black box or leave it to chance

The characters in Bible narratives were real people and as such they can be understood through the disciplines of psychology and neuroscience sciences that describe and explain the thoughts and behaviors of people I have spent my life reading and teaching two major things the Bible and the science of psychology and neuroscience the aim of this book is to explore the interconnection between these two things by focusing on the gospel narratives this book analyzes the teachings and stories of Jesus the lives of other gospel characters and the interactions between people and Jesus during his ministry each chapter focuses on a specific psychological concept things like emotions habits memory and cognitive biases I

teach toward a basic understanding of that concept and introduce information from cutting edge neuroscience research to deepen your knowledge about the brain and mind then i apply that knowledge about psychology and neuroscience to understand how characters acted in the gospel narratives interpret parables jesus taught and explain how we read the bible through sometimes distorted lenses overall i believe that a deeper understanding of humans through the science of psychology gives us greater awe and wonder of god and what he did and does for us
