murphy 2005 about the launch of a luxury car by volkswagen since the introduction of the vw phaeton in may 2002 volkswagen has been under pressure as the company did not reach their sales forecast experiencing dramatic financial losses weernink 2002 it comments on the strategy of vw in terms of branding and positioning it also considers segmentation niche and mass marketing as essential issues for vw various aspects of these issues are discussed as well as their relationship to customer loyalty and how they contribute to a business success finally it is summarised why the future of the vw phaeton is considered to be a bleak it could be shown that positioning is an outgrowth of segmentation and therefore presents an integral part of vw s strategy the paper shows that vw introduced the vw phaeton to move up market and to polish the vw brand however the company did underestimate their own brand which is associated with a people s car at the same time volkswagen missed to serve highly potential segments in the middle class segment in order to position the vw phaeton in the upper class a comprehensive marketing campaign was launched which could not add the missing emotional and prestige value to the vw brand in the final section it is argued why the future of the vw phaeton is a bleak mainly because of a strategic failure regarding the branding strategy
