this is an expository account of work on strong forms of the axiom of determinacy  $\text{ad}$  by a group of set theorists in southern California in particular by W. Hugh Woodin the first half of the book reviews necessary background material including the Moschovakis coding lemma the existence of strong partition cardinals and the analysis of pointclasses in models of determinacy the second half of the book introduces Woodin's axiom system  $\text{mathrm{ad}}$  and presents his initial analysis

of these axioms these results include the consistency of  $\text{ad}$  from the consistency of  $\text{ad}$  and its local character and initial motivation proofs are given of fundamental results by woodin martin and becker on the relationships among  $\text{ad}$   $\text{mathrm ad}$  the axiom of real determinacy and the suslin property many of these results are proved in print here for the first time the book briefly discusses later work and fundamental questions which remain open the study of models of  $\text{ad}$  is an active area of contemporary research in set theory the presentation is aimed at readers with a background in basic set theory including forcing and ultrapowers some familiarity with classical results on regularity properties for sets of reals under  $\text{ad}$  is also expected

when the major powers sent troops to the korean peninsula in june of 1950 it supposedly marked the start of one of the last century s bloodiest conflicts in volume 1 allan millett however reveals that the korean war actually began with partisan clashes two years earlier and had roots in the political history of korea under japanese rule 1910 1945 in volume 2 he shifts his focus to the twelve month period from north korea s invasion of south korea on june 25 1950 through the end of june 1951 the most active phase of the internationalized korean war
