providing the necessary background information and hands on tools to build compelling business cases this book will increase the reader's capability to champion new business development ideas take them to senior management and facilitate the decision process by understanding the key theories and practices of finance and corporate investments

over the past four decades business and academic economists operations researchers marketing scientists and consulting firms have increased their interest and research on pricing and revenue management this book introduces the reader to a wide variety of research results on pricing techniques in a unified systematic way and at varying levels of difficulty the book contains a large number of exercises and solutions and therefore can serve as a main or supplementary course textbook as well as a reference guidebook for pricing consultants managers industrial engineers and writers of pricing software applications despite a moderate technical orientation the book is accessible to readers with a limited knowledge in these fields as well as to readers who have had more training in economics

charging for the use of transport infrastructure has very different traditions in the various modes reflecting the different nature of their infrastructure nodal vs linear but also different historical traditions of open access system integration etc since the early 90's various european commission initiatives took on this issue looking mainly at the road sector where many countries had no direct access charges heavy goods vehicles were systematically identified as the primary targets for a renewed approach to this problem what seemed an easy catch has proved to be much harder with the various countries adopting almost exclusively national approaches and the european institutions unable to drive the process this book looks at the challenges posed by this objective recognising that there are multiple objectives for application of road tolls and charges and discussing the various possible solutions in the technical institutional and legal dimensions the multiplicity of national situations in europe is put in perspective the impacts of various charging schemes on regional development and on the environment are estimated and the recent policy process is analysed allowing a global view of the

remaining difficulties and to make recommendations about the next steps in the process
