the application of private international law to electronic consumer contracts raises new complex and controversial questions it is new because consumer protection was not a private international law concern until very recently and e commerce only became an important commercial activity within the last ten years e consumer contracts generate original questions which have not been considered under traditional private international law theories it is complex because it has to deal both with difficulties raised by consumer

contracts and the challenges of e commerce reasonable resolutions to consumer contracts may prove inappropriate in e commerce while effective approaches to resolving private international law problems in e commerce may be improper for consumer contracts it is controversial because it concerns the conflicting interests of consumers and businesses in a fast moving commercial environment a fair balance is therefore hard to achieve without proper solutions provided by private international law consumers will not be confident about purchasing online and businesses will face unreasonable risk and participation costs in e commerce updated and properly designed private international law rules are essential to the further development of e commerce this book aims to provide an answer to the urgent requirement for legal certainty security and justice in e consumer contracts it is primarily concerned with existing approaches to jurisdiction and choice of law issues in e consumer contracts in the european community and england but some typical approaches in other jurisdictions are also examined based on the analysis and the comparative study of the existing law the book seeks to provide a proposal as to what the law should be in order to provide certainty to both parties to provide reasonable protection to consumers and to promote the development of e commerce

the 14th rehva hvac world congress clima2022 challenges advances in technologies for smart energy transition digitization circularity health and well being in buildings how can we create circular buildings fully heated cooled and powered by renewable energy how can we design human centered indoor environments while mastering life cycle costs how can we also include their integration into infrastructure for energy health data and education
