excerpt from first year mathematics for secondary schools the course of study in american high schools is in process of extensive change the change commenced with the introduction of new subjects at first science began to compete with the older subjects then came manual training commercial and agricultural subjects the fine arts and a whole series of new literary courses in the beginning the traditional subjects saw no reason for mixing in this forward movement and such phrases as regular studies substantial subjects and serious courses were frequently heard as evidences of the complacent satisfaction with which the well established departments viewed the struggles for place of the newer subjects today

however the teachers of mathematics and classics are less anxious than formerly to be classified apart even the more conservative now write books on why they do as they do and they speak with a certain vehemence which betokens anxiety they also prepare many editions of their familiar type of textbook saying of each that it is something which is both old and new all these indications make it clear that the change in the high school curriculum which began with the introduction of new subjects will not come to an end until many changes have been made in the traditional subjects also over against the obstinate conservatism of some teachers is to be set the vigorous movement within all subjects to fit them effectively to the needs of students the interest of today is in supervised study in better modes of helping students to think in economy of human energy and enthusiasm this means inevitably a reworking of the subjects taught in the schools it is the opportunity of this generation of teachers to work out the changes that are needed to make courses more productive for mental life and growth about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

this book is a textbook on civics and government for secondary school students ashley provides an overview of the structure and functions of government at the local state and federal levels as well as an introduction to key concepts in citizenship and political participation the book incorporates case studies and real world examples to illustrate the practical application of these concepts this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant
