this book discusses hong kong s use of onscreen marking osm in public examinations given that hong kong leads the way in osm innovation this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in hong kong the authors discuss their experience of the validation process demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders

one significant area of research in the multifaceted field of bilingualism over the past two decades has been the demonstration validation and account of the so called bilingual advantage this refers to the hypothesis that bilingual speakers have advanced abilities in executive functions and other domains of human cognition such cognitive benefits of bilingualism have an impact on the processing mechanisms active during language acquisition in a way that results in language variation within bilingual populations the notion of language proximity or linguistic distance is also of key importance for deriving variation in

addition sociolinguistic factors can invest the process of language development and its outcome with an additional layer of complexity such as schooling language dominance competing motivations or the emergence of mesolectal varieties which blur the boundaries of grammatical variants this is particularly relevant for diglossic speech communities bidialectal or bivarietal speakers the defined goal of the present research topic is to address whether the bilingual advantage extends to such speakers as well thus linguistic and cognitive profiles for speakers of linguistically proximal languages and varieties become an important matter within developmental modal and pathological variation
