the new edition of this comprehensive textbook is a complete guide to the diagnosis and management of ocular disorders the text has been reorganised into six key sections anatomy and physiology optics and refraction diseases of the eye and ocular adnexa ocular therapeutics systemic and community ophthalmology and practical ophthalmology the seventh edition has been fully revised with many new topics added to cover the latest advances in the field nearly 1000 clinical photographs diagrams and tables further enhance the text the accompanying free book review of ophthalmology provides multiple choice questions mcqs commonly encountered in examinations to assist revision key points comprehensive guide to diagnosis and management of ocular disorders fully revised seventh edition with new topics included accompanying free book provides mcqs to assist revision previous edition 9789351526575 published in 2015

the supplementary book review of ophthalmology is also thoroughly revised and updated with recent advances new concepts and principles of investigation treatment and surgical procedures developed since the previous edition the second half of the book provides multiple choice questions corresponding to each of the twenty review chapters publisher

the biotechnology business in india with an increase from usd 500 million in 1997 and reaching an estimated usd 1 billion next year health related products accounting for 60 agro and veterinary products together 15 and contract rd reagents devices and supplies adding up to the remaining 25 of which the diagnostics share was about 10 of the total surely presented an encouraging picture even five years ago while volumes have increased the pattern has not according to a report prepared by mckinsey co india s pharmaceutical industry including domestic and export sales and contract services totals nearly usd 5 billion furthermore the company optimistically projects the growth to a factor of five fold only if both the industry and the government are able to

put in place achievable solutions that must take care of the formidable obstacles preventing further growth if this assessment is correct then the established transformation made by it growth should also provide the confidence required by the high expectations for biotechnology which have arisen in the country in recent years some contributors to this are overenthusiastic these are bureaucrats some retired scientists and of course the complacent politicians who have the least knowledge of what the new biotechnology is all about however there are clear indications of biotechnology growth demonstrated by a few but rapidly expanding biotech companies such as biocon ltd shantha biotech p ltd dr

rice is now the model plant for genetic research on crop plants and those who work on rice do so not only to help grow and eat it but also to advance the frontiers of genetics and molecular biology progress made in the last 20 years since the first international rice genetics symposium irgs has made rice the organism of choice for research on crop plants and it has become a reference genome this volume is a collection of the papers presented at the fifth irgs in 2005 it reports the latest developments in the field and includes research on breeding mapping of genes and quantitative trait loci identification and cloning of candidate genes for biotic and abiotic stresses gene expression as well as genomic databases and mutant induction for functional genomics

theory and practice of optics and refraction in its fifth edition continues to be a part of modern system of ophthalmology mso series without altering the basic text and layout each chapter has been thoroughly revised to keep abreast with the newer concepts and principles of optics and refraction involved in investigative as well as therapeutic optical modalities evolved over the period of time provides information on basic principles of optics refraction and optical instruments to ophthalmology residents and students of optometry as well as orthoptics text is organized in an attractive four colour format to make the understanding retention and reproducibility of facts easy includes newer concepts in refractive surgery like topoguided lasik contoura vision technology all femtosecond laser surgery relex and corneal inlay for presbyopia including presbyopic allogenic refractive lenticule pearl recently available phakic and near vision enabling intra ocular lenses

have been added future refractive surgeries such as lenticular implant and like have been added incorporates advances in aberrometry wavefront technology anterior segment optical coherence tomography as well as enhanced depth of field oct confocal microscopy of cornea and anterior segment ultrasound bio microscopy ubm digital eye strain and role of smartphones in ophthalmology have been discussed in detail chapter on clinical refraction has been refurbished effectively and text on corneal topography expanded with essential newer developments

the book is about the seed development in the model and crop plants seed development is a key step of the plant life cycle that determines the nutrient value of seeds the life for human civilization growth and development the nutrient value of seeds is mainly due to storage reserve products such as carbohydrates lipids triacylglycerols and proteins the book primarily focuses on application of the 21st century high throughput technologies transcriptomics proteomics metabolomics and systems biology in near complete understanding of the various processes involved in seed development in different crop plants the book reveals how such technologies have revolutionized our understanding of the multilayer processes and regulations involved therein by generating large scale datasets accumulated datasets provide basic knowledge to develop integrated strategies to eventually improve the nutritional value of plant seed and crop yield a critical goal in food security issues around the globe

genomics research has great potential to revolutionize the discipline of plant breeding this two volume set provides a critical assessment of genomics tools and approaches for crop breeding volume 1 entitled genomics approaches and platforms illustrates state of the art genomics approaches and platforms presently available for crop improvement volume 2 entitled genomics applications in crops compiles crop specific studies that summarize both the achievements and limitations of genomics research for crop improvement we hope that these two volumes while providing new ideas and opportunities to those working in crop breeding will help graduate students and teachers to develop a better understanding of the applications of crop genomics to plant research and breeding

the second edition of the book has been revised keeping in mind the requirements of undergraduate students preparing for the practical examinations it provides a complete and exact scheme and pattern of practical examinations it will be of great help to the students during their clinical postings hopefully it will also serve as a handbook for the junior residents opting for a career in ophthalmology salient features the book has been organised into six sections section 1 introduces the students with practical examinations section 2 describes clinical methods in detail which is a special feature of the book section 3 includes salient features of important long and short clinical cases and related viva questions section 4 deals with the darkroom procedures section 5 includes ophthalmic instruments and operative ophthalmology section 6 describes spots employed in ophthalmology practical examinations viva questions are an integral and most important constituent of this book
