this book shows how critical management studies cms scholarship is starting to develop a character of its own in south africa it attests to cms slowly gaining momentum and acquiring an identity of its own amongst south african scholars however management studies in south africa is dominated by capitalist ideology and positivist methodology although interpretive scholarship has gained some momentum it still falls within the parameters of mainstream capitalist thinking scholarship outside the domain of capitalist thinking such as critical scholarship remains sorely underexplored being entrenched in the positivist tradition is arguably a major achilles heel for the progression of management as a field of inquiry cms presents a vehicle for alternative epistemologies to be heard in the management discourse with its focus on power imbalances struggles for emancipation from oppression and distrust of capitalism cms provides the peripheral point of view with a voice cms presents a space where scholars can engage with south african realities surrounding political cultural social and historical contexts and issues in management this book is promoting cms to the scholarly community to show that there are exciting possibilities being offered by a different approach to management scholarship this book also forms part of a larger project of growing cms in south africa and is a collection of original works by academics actively working in cms following various methodological approaches which can be categorised into two broad methodological categories namely conceptual work and empirical work following an interpretive approach

the purpose of this book is to establish the first formalised scholarly work on critical management studies cms in the south african context the book is a collection of seven chapters six of which employ a conceptual methodology and one of which follows an interpretive paradigm employing qualitative methods of inquiry cms is a relatively young school of thought arising in the early 1990s and still very much a peripheral movement within the academic discipline of management south africa has very little scholarship on cms as precious few scholars work in this space furthermore publication opportunities

are virtually non-existent as CMS is virtually unknown in the South African community of management scholars thus this book represents the first academic work on CMS published in South Africa written and reviewed by scholars who are familiar with the field the primary target readership would be management academics but it could also be a useful reference for postgraduate students in management
