in a worldwide context of ever growing competition for water and land climate change droughts and man made water scarcity and less participatory water governance agriculture faces the great challenge of producing enough food for a continually increasing population in this line this book provides a broad overview of innovation issues in the complex water agriculture food nexus thus also relative to their interconnections and dependences issues refer to different spatial scales from the field or the farm to the irrigation system or the river basin multidisciplinary approaches are used when analyzing the relationships between water agriculture and food security the covered issues are quite diverse and include innovation in crop evapotranspiration crop coefficients and modeling updates in research relative to crop water use and saving irrigation scheduling and systems design simulation models to support water and agricultural decisions issues to cope with water scarcity and climate change advances in water resource quality and sustainable uses new tools for mapping and use of remote sensing information and fostering a participative and inclusive governance of water for food security and population welfare this book brings together a variety of contributions by leading international experts professionals and scholars in those diverse fields it represents a major synthesis and state of the art on various subjects

thus providing a valuable and updated resource for all researchers professionals policymakers and post graduate students interested in the complex world of the water agriculture food nexus

the inclusion of oncogene driven reprogramming of energy metabolism within the list of cancer hallmarks hanahan and weinberg cell 2000 2011 has provided major impetus to further investigate the existence of a much wider metabolic rewiring in cancer cells which not only includes deregulated cellular bioenergetics but also encompasses multiple links with a more comprehensive network of altered biochemical pathways this network is currently held responsible for redirecting carbon and phosphorus fluxes through the biosynthesis of nucleotides amino acids lipids and phospholipids and for the production of second messengers essential to cancer cells growth survival and invasiveness in the hostile tumor environment the capability to develop such a concerted rewiring of biochemical pathways is a versatile tool adopted by cancer cells to counteract the host defense and eventually resist the attack of anticancer treatments integrated efforts elucidating key mechanisms underlying this complex cancer metabolic reprogramming have led to the identification of new signatures of malignancy that are providing a strong foundation for improving cancer diagnosis and monitoring tumor response to therapy using appropriate molecular imaging approaches in particular the recent evolution of positron emission tomography pet magnetic resonance spectroscopy mrs spectroscopic imaging mrsi functional mr imaging fmri and optical imaging technologies combined with complementary cellular imaging approaches have created new ways to explore and monitor the effects of metabolic reprogramming in cancer at clinical and preclinical levels thus the progress of high tech engineering and molecular imaging technologies combined with new generation genomic proteomic and phosphoproteomic methods can significantly improve the clinical effectiveness of image based interventions in cancer and provide novel insights to design and validate new targeted therapies the frontiers in oncology research topic exploring cancer metabolic reprogramming through molecular imaging focusses on current achievements challenges and needs in the application of molecular imaging methods to explore cancer metabolic reprogramming and

evaluate its potential impact on clinical decisions and patient outcome a series of reviews and perspective articles along with original research contributions on humans and on preclinical models have been conceretedly included in the topic to build an open forum on perspectives present needs and future challenges of this cutting edge research area
