this comprehensive text systematically explains the various principles policies and methods involved in efficient management of working capital the indian context is emphasised throughout the book provides an indepth analysis of such critical issues as assessment of the level of working capital methods of financing control

over the use of funds the book discusses both fund based and non fund based working capital finance it also explains export information technology and software industry financing the book presents several real life cases to illustrate the various principles and techniques each chapter ends with a summary providing a quick and useful review of the chapter several questions and problems are also included throughout the book for self test the book is an ideal text for management and commerce students it would also serve as an extremely useful reference source for practising professionals and consultants in the finance and banking sectors

the overwhelming support from readers this is the 3rd edition of the book which has been updated to 31 05 2019 various banking authorities on credit entrepreneurs education institutions have appreciated the language and contents of working capital in simple language covering various problems being faced by the officers joining the banks for the last two decade this book is very convenient and understandable logically with all the ins outs of the working capital management and its finance it will prove to be a bible for all the officers who are working in the banks including the students of mba finance entrepreneurs but have no background of financial terminology and its technical aspects with logical understanding

bachelor thesis from the year 2015 in the subject business economics investment and finance grade 1 3 leuphana universität lüneburg institut für bank finanz und rechnungswesen ibfr course bachelorkolloquium language english abstract the present thesis tries to figure out if the working capital management of german companies is reactive to changing interest rates for their refunding or if it is really a pro active improvement since the beginning of the 2000s as claimed by the literature after a theoretical definition of working capital its functions goals and its relationship to the management process working capital will be set into a context of company crises to lead to the central object of investigation the global financial crisis with a quantitative analysis via datastream of the companies currently listed in the dax mdax and sdax n 130 it will be examined if the credit crunch for companies in the global financial crisis and the easy refunding possibilities afterwards due to the easy money policy of the european central bank had effects on the quality of the working capital management the analysis of the data via spss will show that the possibilities of refunding indeed influence this quality whereby the intensity of the reactionary behaviour of the companies depends mainly on the

object of cognition which is in this thesis examined by the parameters size age and industry sectors so that the results could serve as a basis for further management research

working capital is commonly understood as the fund needed to meet the day to day expenses of an enterprise a finance manager finds that the funds for meeting these expenses get blocked in current assets he therefore looks for liquidity support in net working capital nwc which is equivalent to the excess of current assets over current liabilities a banker also looks at the size of nwc as the long term stake of the business in funding the current assets but for a production manager liquidity is synonymous to uninterrupted supply of material inputs to the production lines similarly for a marketing manager if there is no production his marketing outlets dry up despite demand in the market while the finance manager discourages overstocking of inventory the production manager and the marketing manager dread of being out of stock in this conflict the goal of the organisation often takes a back seat this book aims at resolving these conflicts by adopting a techno financial approach to working capital management in the previous edition a full chapter on service business risk analysis and working capital assessment was introduced to understand the nature of service business and the risks associated with it followed by developing a model for assessment of working capital requirement whereas in the fourth edition a new chapter on technological progress innovations and startups a new financing methodology has been introduced to fill a long felt gap in financing of emerging industries besides the book is revised and updated extensively by incorporating the current researches in the field particular mention can be made of cash pooling system bullwhip effect and newer approaches to inventory recording system throughout the book every concept is presented with worked out examples and case studies for easy comprehension of the subject the book is primarily addressed to postgraduate students majoring in finance and to those pursuing professional courses in accounts ca and cost accounting icwa the book will also be very useful for practising finance executives risk managers and also purchase materials managers target audience o mba finance o ca and icwa aspirants
