Managing a major case is among the most challenging managerial functions that anyone in law enforcement can perform, and there are numerous pitfalls to avoid. It is the goal of this book to provide law enforcement managers with the necessary tools and strategies they can use in managing their next major case. Many of these strategies were learned through trial and error. It begins with a look at the various elements of the investigative process, organization of the investigative unit, whether it is a general assignment or highly specialized unit, is discussed as well as how to determine proper

Since the majority of current publications propose computer systems, adequate guidelines for the development of non-computerized methods for collecting, processing, and using law enforcement information are not available. In an attempt to fill the gap, a research project was developed in the Post Center for Police Management (CPM). Specifically, CPM consultants were assigned the task of developing a document which would provide law enforcement agencies with practical guidelines for the collection and utilization of law enforcement data and information. Due to the broad scope of this project, the information addressed has been divided into two documents. The first document covers the basic information requirements of a law enforcement agency and proposed programs for meeting these requirements. The second document describes detailed procedures for conducting a patrol workload study for purposes of allocation and distribution of patrol manpower.
